Who wore it

VANESSA HUDGENS

ROSARIO DAWSON

Less is more

Stylehive.com editorial director Chris Kensler says that Vanessa's decision to pile on the accessories with this busy French Connection dress makes it look like she's playing dress-up. Rosario wisely limits herself to well-coordinated heels and simple gold hoops.

JANUARY JONES

KATHARINE MCPHEE

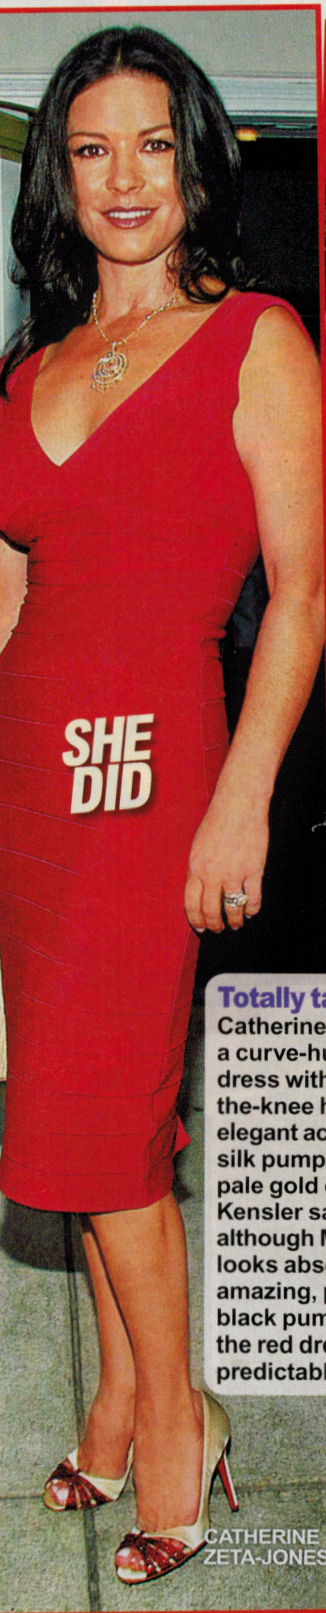

Green extreme

Mad Men star January Jones' matching heels are overkill with her Rory Becca dress. Plus, her strappy sandals look odd worn with wintry tights — it's out of synch with the summery style. Katharine, at the same Las Vegas Tao party, is more chic in neutral pumps, sleek hair and bare legs.

Totally tasteful

Catherine tames a curve-hugging dress with a below-the-knee hem and elegant accents like silk pumps and a pale gold clutch, Kensler says. And although Mel's body looks absolutely amazing, pairing black pumps with the red dress is predictable.

Inspired style

For this sexy dress, it's important to choose accents that complement rather than clash with the sultry style. Stacy's shoes cover too much of her feet and come off as conservative. But *Heroes* star Eriko's flirty sandals seem to be inspired by the saucy design.

TO RUSSIA WITH LOVE

Paris stole the show during Moscow's Fashion Week on October 29, when she appeared on the runway with 15-year-old designer Kira Plastinina. "Russia was beautiful," Paris says. "It was my first time there. The food was incredible. The caviar was so good!"

"I fly out to Tokyo a lot — usually by myself — so it was fun to go with my sister," Paris tells *In Touch*. "It gets lonely traveling solo." The sisters also promoted their bag line at Samantha Thavasa's boutique.

SEOUL TO SEOUL

Paris journeyed to South Korea on November 9. "The people were so sweet to me," she says. The heiress participated in traditional Korean customs and appeared on a comedy show. "I wore a traditional Korean wedding dress, and as a joke, they all competed to win a fake dinner date with me!"

TO PARTY

Paris Hilton tells *In Touch* exclusively about her whirlwind tour of Russia, Japan and South Korea

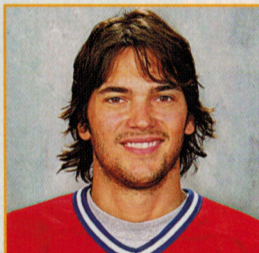

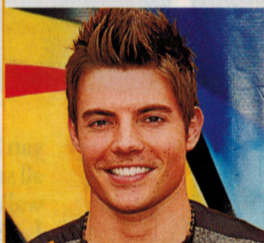

MEN FROM AROUND THE WORLD LOVE PARIS

And they can all tell her "That's hot" in their languages!

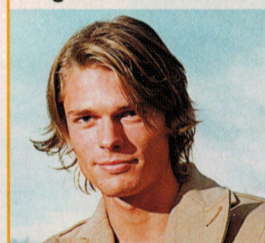

JOSH HENDERSON "THAT'S HOT!"

Paris has dated a handful of American guys, including Nick Carter, Travis Barker and, in March, Josh, 26, who stars on *Desperate Housewives*.

ALEX VAGGO "DEN DÄR ER HET!"

In September, Paris got sweet with this 22-year-old Swedish tourist. "She changed my life in every way," a grateful Alex said.

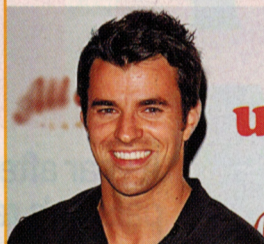

JOSE THEODORE "THAT'S HOT, EH!"

Paris gets action north of the border, too. In June 2006, she canoodled with the Canadian NHL star, 31, in Toronto.

STEVE JONES "THAT'S BLOODY PEASY!"

After dining at London's Nobu with Paris a year ago, the British TV presenter, 30, gushed, "She is a great girl."

STAVROS NIARCHOS "POLY KAFTO!"

Paris was engaged to Greek shipping heir Paris Latsis and then dated Stavros, 22, another Greek shipping heir, for a year-and-a-half.

ROB MILLS "SHE'S A SPUNK!"

In 2003, while filming *House of Wax*, Paris was spotted making out with the Australian *Idol* star, 25, on her hotel balcony.

PARIS TAKES MANHATTAN

On November 14, Paris returned home to the U.S. to do what she does best — party! The 26-year-old sang and twirled around a stripper pole at a club promoter's birthday party at Marquee in New York City. "It was so much fun," Paris says.

"Ryan is loving playing the field," a friend tells *In Touch*. "He's really having fun and making up for lost time, and always going out. He is seeing a lot of people."

A pal says that Ryan gets bored in relationships: "He loved being home with his family, but he needs some excitement or he gets depressed."

Ryan Phillippe was all smiles as he walked through LAX airport with his two kids, Ava, 8, and Deacon, 4. The doting dad had just returned from a trip to Philadelphia on November 12, where he'd been watching his children for the weekend while his ex-wife, Reese Witherspoon, enjoyed a romantic getaway with new boyfriend Jake Gyllenhaal at the Carneros Inn in Napa Valley, Calif.

Though he's never admitted to straying, Ryan's reported closeness to his *Stop Loss* co-star Abbie Cornish allegedly led to the breakup of his marriage — but Ryan no longer has to feel guilty about hurting Reese, a pal says. "Now that she is happy at last, Ryan is enjoying his

Ryan isn't looking to settle down again yet. Insiders say he has been seeing several women casually, and was last spotted with Abbie, 25, in LA in August.

"That's normal," says psychologist Dr. Judith B. Kuriensky, who does not treat Ryan. "Running around is a way to protect himself from depressive feelings."

They're getting serious

Ryan's approval of Jake and Reese's relationship, which began after they co-starred

in *Rendition*, couldn't have come at a better time. On November 9,

the couple had a romantic dinner at West Hollywood eatery Madeo, where Jake, 26, "told Reese he wants to start a family in the near future," says a friend.

Reese, meanwhile, gave Jake the keys to her house — a sure sign of trust. "They are no longer hiding their emotions," says a friend. "It's obvious they are madly in love."

Reese trusts him

"Jake has no interest in playing the field," says a pal. "They're a perfect match."

LAUREN ANSWERS your *Hills* questions

Lauren Conrad shares secrets from *The Hills* about dating and what happens when the cameras aren't rolling

With two hit reality shows under her belt, Lauren, 21, has become a breakout star.

Are you dating anyone special right now? — Danielle Michaud, Bristol, Conn.

I've been on a couple of good dates lately. Unfortunately, most of them could not be filmed because the guys have their own things that interfered. Some actors, athletes and people have careers that won't allow them to be on a reality show. Maybe that's why those dates work.

Heidi moved out of your apartment in such a hurry. How'd that happen so fast? — Naomi Krakower, Albany, N.Y.

Audrina moved in right after she left. I was so happy about that. Literally, we moved Heidi's stuff out for her. Audrina showed up to move and Heidi's stuff was still there, because it was so quick. Also, what no

one saw was Heidi actually gave her dog to Jen Bunney.

You've been on the cover of *Teen Vogue* twice. Do they treat you differently than other interns? — Michael Andersen, Richardton, N.D.

It actually doesn't change it at all. At the magazine, I'm still treated the same. They don't care if you're on the cover or in the intern closet. I love working backstage, like when we filmed the Young Hollywood Party. I literally worked a 12-hour day nonstop!

Have any of your friends refused to be filmed for the show? — Abby Perer, Pittsburgh

Yes, I have a lot of friends who just have no interest in being on the show. They have their

own careers to worry about. A lot of people that were on *Laguna Beach* with me want to separate themselves from reality TV, so they choose not to be on the show. I have some friends on, some friends off—it's kind of nice that way.

What do you do when the cameras aren't around? — Leah Hathcock, Atlanta

Honestly, when the cameras are not around we do nothing. We can't just lay around when the cameras are there, because it's boring. So when they're gone, we'll just rent DVDs or go shopping, just sort of relax. Also, now when we get a day off, I work on my clothing line. It's my second job.

It's never too late to be fabulous.

How Kelly lost 30 POUNDS

American Idol's Kelly Clarkson is slimmer than ever and ready for a comeback!

THEN

Weighing an estimated 170 pounds in April, pressure from public feuds over her career led Kelly to turn to food for comfort.

After a bitter dispute with her record label earlier this year, Kelly Clarkson started snacking to ease the stress. "The extra weight just seemed to creep up on her, but one day, she woke up and decided she'd had enough," a friend tells *In Touch*. Now, thanks to cutting calories in half and doubling up on workouts (and calling a truce with her label), the 25-year-old pop star is in great shape for her world tour. And she showed off her toned body at a Motorola party on November 8.

NOW

At 140 pounds, Kelly will flaunt her fab figure during an NFL performance on Thanksgiving Day. "She never cheated on her diet," a pal says.

Introducing LYBREL.

Birth control that makes it possible to go without your monthly period.

What is the LYBREL difference?

LYBREL is the first and only FDA-approved low dose combination birth control pill that you take every day, 365 days a year without placebos. This means it's possible to go without your monthly period for as long as you take LYBREL. While women stop having their regular monthly periods, most women initially experience breakthrough bleeding and spotting. This usually lessens over time. For some, this may continue, but regardless of any unexpected bleeding, LYBREL remains highly effective birth control.

Is it OK to not have my period?

Many health care professionals agree that there is no need to have a period while taking the Pill. Just ask yours.

How do I learn more about LYBREL?

Ask your health care professional. You can also visit www.lybrel.com or call 1-877-LYBREL-0.

IMPORTANT SAFETY INFORMATION

The Pill does not protect against HIV or other sexually transmitted diseases.

Some women should not use the Pill, including women who have blood clots; breast, uterine, or liver cancers; a history of heart attack, stroke, or breast cancer; and those who are or may be pregnant. Serious risks associated with the Pill which can be life threatening, include blood clots, stroke, and heart attacks.

Cigarette smoking increases the risk of serious adverse effects on the heart and blood vessels from oral contraceptive use, especially if you are over 35. Women who use the Pill are strongly advised not to smoke.

LYBREL provides more hormonal exposure per year than conventional cyclic oral contraceptives containing the same or similar strength of the hormones estrogen and progestin.

Because regular monthly bleeding does not occur on LYBREL, it may be difficult to recognize if you get pregnant. If you suspect pregnancy, or if you have symptoms such as nausea/vomiting or unusual breast tenderness, you should take a pregnancy test and contact your health care professional.

The most common side effects reported with LYBREL in a clinical trial were headaches, menstrual cramps, upper respiratory infection, vaginal bleeding, and nausea.

Brief Summary Patient Package Insert

This product (like all oral contraceptives) is intended to prevent pregnancy. Oral contraceptives do not protect against transmission of HIV (AIDS) and other sexually transmitted diseases (STDs) such as chlamydia, genital herpes, genital warts, gonorrhea, hepatitis B, and syphilis.

Oral contraceptives, also known as "birth-control pills" or "the pill," are taken to prevent pregnancy, and when taken correctly, have a failure rate of approximately 1-2% per year (1 to 2 pregnancies per 100 women per year of use) when used without missing any pills. The average failure rate of large numbers of pill users is approximately 5% per year (5 pregnancies per 100 women per year of use) when women who miss pills are included. However, forgetting to take pills considerably increases the chances of pregnancy. Lybrel is a birth-control pill that is taken every day. When you take Lybrel, the lining of your uterus does not undergo the changes needed for menstruation, and therefore you do not have regular menstrual periods. You are likely to have unscheduled or unplanned bleeding or spotting when you start to use Lybrel. The number of days each month with unscheduled bleeding and spotting usually decreases over time for the majority of women. When using Lybrel, the convenience of having no regular menstrual periods should be weighed against the inconvenience of unscheduled or unplanned breakthrough bleeding and spotting.

For the majority of women, oral contraceptives can be taken safely. However, there are some women who are at high risk of developing certain serious diseases that can be life-threatening or may cause temporary or permanent disability or death. The risks associated with taking oral contraceptives increase significantly if you:

- smoke
- have high blood pressure, diabetes, high cholesterol, or a tendency to form blood clots, or are obese
- have or have had clotting disorders, heart attack, stroke, angina pectoris, cancer of the breast or sex organs, jaundice, malignant or benign liver tumors, or major surgery with prolonged immobilization
- have headaches with neurological symptoms

You should not take the pill if you suspect you are pregnant or have unexplained vaginal bleeding.

Although cardiovascular disease risks may be increased with oral contraceptive use in healthy, non-smoking women over 40 (even with the newer low-dose formulations), there are also greater potential health risks associated with pregnancy in older women.

Cigarette smoking increases the risk of serious adverse effects on the heart and blood vessels from oral contraceptive use. This risk increases with age and with the amount of smoking (15 or more cigarettes per day has been associated with a significantly increased risk) and is quite marked in women over 35 years of age. Women who use oral contraceptives should not smoke.

Most side effects of the pill are not serious. The most common such effects are nausea, vomiting, unscheduled bleeding, weight gain, breast tenderness, and difficulty wearing contact lenses. These side effects, especially nausea and vomiting, may subside within the first three months of use.

The serious side effects of the pill occur very infrequently, especially if you are in good health and do not smoke. However, you should know that the following medical conditions have been associated with or made worse by the pill:

1. Blood clots in the legs (thrombophlebitis), lungs (pulmonary embolism), stoppage or rupture of a blood vessel in the brain (stroke), blockage of blood vessels in the heart (heart attack and angina pectoris) or other organs of the body. As mentioned above, smoking increases the risk of heart attacks and strokes and subsequent serious medical consequences. Women with migraine also may be at increased risk of stroke with pill use.
2. Liver tumors, which may rupture and cause severe bleeding. A possible, but not definite, association has been found with the pill and liver cancer. However, liver cancers are extremely rare. The chance of developing liver cancer from using the pill is thus even rarer.
3. High blood pressure, although blood pressure usually returns to normal when the pill is stopped.

The symptoms associated with these serious side effects are discussed in the detailed leaflet given to you with your supply of pills. Notify your health care provider if you notice any unusual physical disturbances while taking the pill. In addition, drugs such as rifampin, as well as some anticonvulsants and some antibiotics, herbal preparations containing St. John's Wort (*Hypericum perforatum*), and HIV/AIDS drugs may decrease oral contraceptive effectiveness.

Various studies give conflicting reports on the relationship between breast cancer and oral contraceptive use.

Oral contraceptive use may slightly increase your chance of having breast cancer diagnosed, particularly if you started using hormonal contraceptives at a younger age.

After you stop using hormonal contraceptives, the chances of having breast cancer diagnosed begin to go down, and disappear 10 years after stopping use of the pill. It is not known whether this slightly increased risk of having breast cancer diagnosed is caused by the pill. It may be that women taking the pill were examined more often, so that breast cancer was more likely to be detected. You should have regular breast examinations by a health care professional and examine your own breasts monthly. Tell your health care professional if you have a family history of breast cancer or if you have had breast nodules or an abnormal mammogram. Women who currently have or have had breast cancer should not use oral contraceptives because breast cancer is usually a hormone-sensitive tumor.

Some studies have found an increase in the incidence of cancer of the cervix in women who use oral contraceptives. However, this finding may be related to factors other than the use of oral contraceptives.

Taking the pill provides some important noncontraceptive benefits. These include less painful menstruation, fewer pelvic infections, and fewer cancers of the ovary and the lining of the uterus.

Be sure to discuss any medical condition you may have with your health care provider. Your health care provider will take a medical and family history before prescribing oral contraceptives and will examine you. The physical examination may be delayed to another time if you request it, and the health care provider believes that it is appropriate to postpone it. You should be reexamined at least once a year while taking oral contraceptives. The detailed patient information leaflet gives you further information which you should read and discuss with your health care provider.

What You Should Know About Your Menstrual Cycle When You Use Lybrel

You are likely to have unscheduled or unplanned bleeding or spotting when you start to use Lybrel. The number of days each month with bleeding or spotting usually decreases over time in the majority of women. In a study of Lybrel, about 5 out of 10 women had 7 or more days of bleeding or spotting while using their third 28-day pill pack of Lybrel. The number of women with 7 or more days of bleeding or spotting decreased to 3 out of 10 women during the use of their seventh pill pack. Among women who continued to use Lybrel for one year, about 6 out of 10 women had no bleeding or spotting during their last month of use. Do not stop taking Lybrel because of bleeding or spotting as this will increase your chance of getting pregnant. If the spotting or bleeding continues for more than 7 consecutive days or if the bleeding is heavy, call your health care provider.

Can I Get Pregnant While Taking Lybrel?

You are not likely to get pregnant if you take Lybrel at the same time everyday as directed by your health care provider. Because regular monthly bleeding does not occur on Lybrel, it may be difficult to recognize if you get pregnant. If you suspect that you may be pregnant, or if you have symptoms of pregnancy such as nausea/vomiting or unusual breast tenderness, you should have a pregnancy test and you should contact your health care professional. Stop taking Lybrel if you are pregnant.

PREGNANCY AFTER STOPPING THE PILL

If you do not desire pregnancy, you should use another method of birth control immediately after stopping Lybrel. You can get pregnant within days after stopping Lybrel.

KIM
KARDASHIAN

FASHION FLUNKIE

This is one of those looks that's fun to try on at the store, but *High School Musical*'s Ashley gets an F for actually wearing this bizarre pant/corset on national TV!

MODEL MISTAKE

It's hard to say what's weirder about Christie's ensemble: the fact that her pants give off a "Mom Jeans" vibe or that her pockets are mysteriously on the outside.

SHORT ON STYLE

Jaslene may have won the title of America's Next Top Model, but she certainly won't be adding stylist to her resume after deeming these pants red-carpet worthy!

KILLER COMBO

Kim's got curves that any woman would envy, but by opting for pants that are wide-legged and high-waisted, she doesn't do her voluptuous figure any favors.

**People will
always talk**

"If Tom was married
16 times, or never
at all, his enemies
would still be in full
force," says Paul.

Hollywood's **BIGGEST** **RUMOR** answered

Stories about Tom Cruise's sexuality have haunted his career, but a private investigator says he knows the truth

He's been married three times and has also been romantically linked with

some of Hollywood's most desirable women. Yet for nearly all of his career, Tom Cruise has been subject to pervasive rumors that he's gay. Though Tom's camp has repeatedly denied the talk, it has persisted over the years, with two men even claiming to have had affairs with him — tales which Tom, 45, was willing to challenge in a court of law.

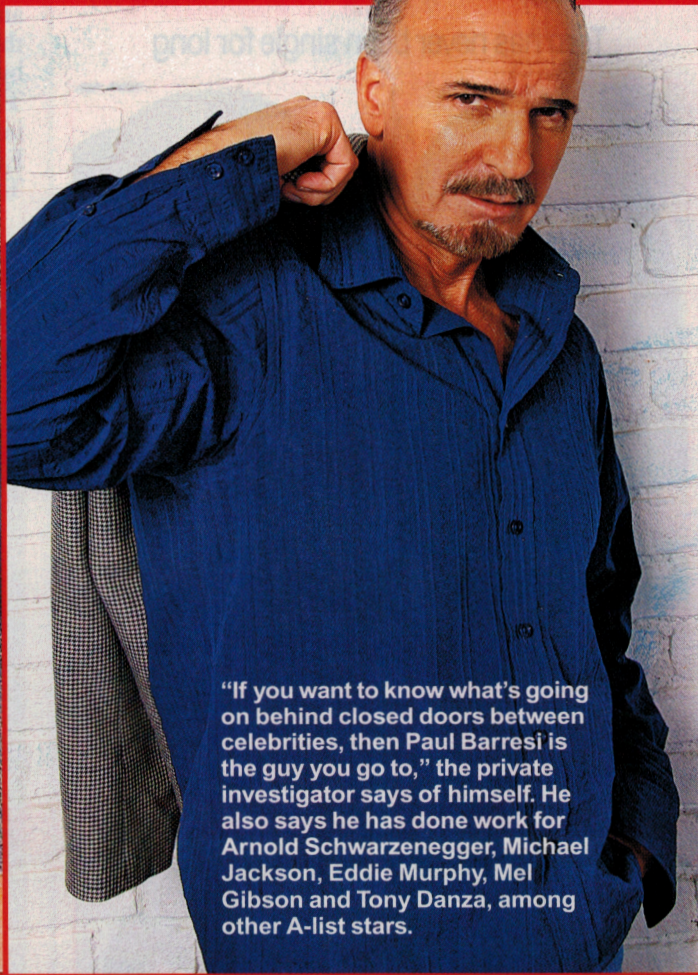

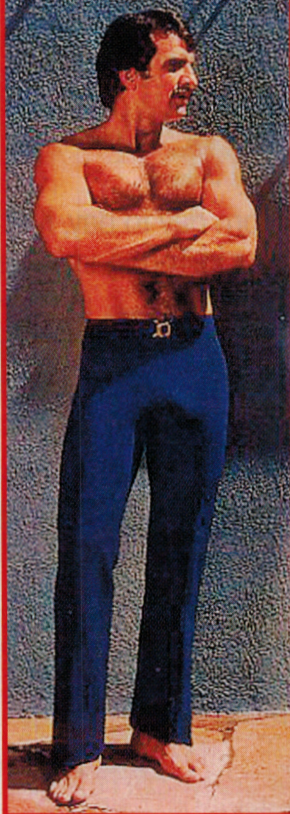

He looked for secrets

Now, a third man is ready to speak publicly about Tom's sexuality. Porn star-turned-private investigator Paul Barresi conducted an extensive investigation of the gay rumors, and he gave his findings to Andrew Morton for his upcoming unauthorized biography of the star. In an exclusive interview, Paul, 59, says he believes that Tom is straight. "Everything I've found, and everything I know, points to Tom being heterosexual," Paul tells *In Touch*.

Paul, who has never met Tom, began his independent investigation in late 2001, the same year Tom divorced his second wife, Nicole Kidman — after two gay porn stars separately claimed to have slept

The former porn star-turned-private investigator

Paul has another career as an X-rated movie producer, director, writer and actor.

"If you want to know what's going on behind closed doors between celebrities, then Paul Barresi is the guy you go to," the private investigator says of himself. He also says he has done work for Arnold Schwarzenegger, Michael Jackson, Eddie Murphy, Mel Gibson and Tony Danza, among other A-list stars.

The end of Tom and Nicole's marriage started a lot of gossip

Tom and Nicole spent nearly a year out of the public eye in London filming 1999's thriller *Eyes Wide Shut* for director Stanley Kubrick. When the couple announced their separation in February 2001, it was the perfect time for opportunists to come forward to claim they had had affairs or liaisons with Tom during the time he was out of the country filming the movie. "Certain times can be ideal to plant problems for a celebrity," explains Paul.

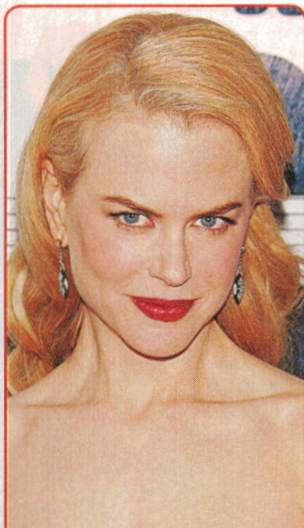

The women who stole his heart

Tom has never been single for long

Mimi was his first wife

Tom married Mimi Rogers, who reportedly introduced him to Scientology, in May 1987. The couple's divorce was finalized in 1990.

He bounced back with Nicole

Just 10 months after his divorce from Mimi was finalized, Tom married Nicole Kidman. Their marriage lasted a decade until they broke up in 2001.

He never wed Penelope

Tom has said that his romance with his *Vanilla Sky* co-star Penelope Cruz didn't begin until after he and Nicole split. They broke up in January 2004.

He swept Katie off her feet

Tom and Katie began dating in April 2005. Almost exactly a year later, their baby, Suri, was born. They married in Bracciano, Italy, in November 2006.

with Tom. The first, Kyle Bradford, told a French magazine in February of that year that he'd had an ongoing affair with the star — and was sued by Tom for \$100 million. The second man Paul interviewed told the European press he'd met Tom in a London restaurant.

After Paul interviewed the

second man, he concluded that the porn star was “lying through his teeth. When I tried to get specifics, he was struggling to try to come up with the details,” he explains. “For example, does Tom have any distinguishable marks on his body or on his face? What color is his hair? You know,

THE UPS AND DOWNS

From day to day, it's hard to tell who's the bigger star in Tom and Katie's marriage

THEY SAW EYE TO EYE LAST NOVEMBER

Rumors suggested that Katie was crouching underneath her Armani gown so they could appear to be the same height for their wedding portrait.

things that, when you're up close and personal with someone, you recognize. He fell short in coming up with answers."

Later, Paul checked out the timing of the story with Tom's legal team, who said that Tom was "not even in London at that time." Although the second man had

announced plans to write a tell-all book, it never happened. Meanwhile, Tom won a \$10 million default judgment against Bradford in 2003 after he reportedly admitted that his story was false.

Who started the gossip

But still, the rumblings persist. "All of these rumors

have been flying," Paul points out, "and there hasn't been one piece of solid evidence to prove that he's gay."

Although Paul says that he spoke to two other men who claimed to have had liaisons with Tom, he explains, "When I confronted them about it, one denied it and the other

wanted half a million dollars. Neither was credible."

So why all the talk? "I believe the rumors about Tom being gay come from his detractors — most of whom are former Scientologists," Paul says. "Tom is the most famous Scientologist. Therefore, he is the biggest target."

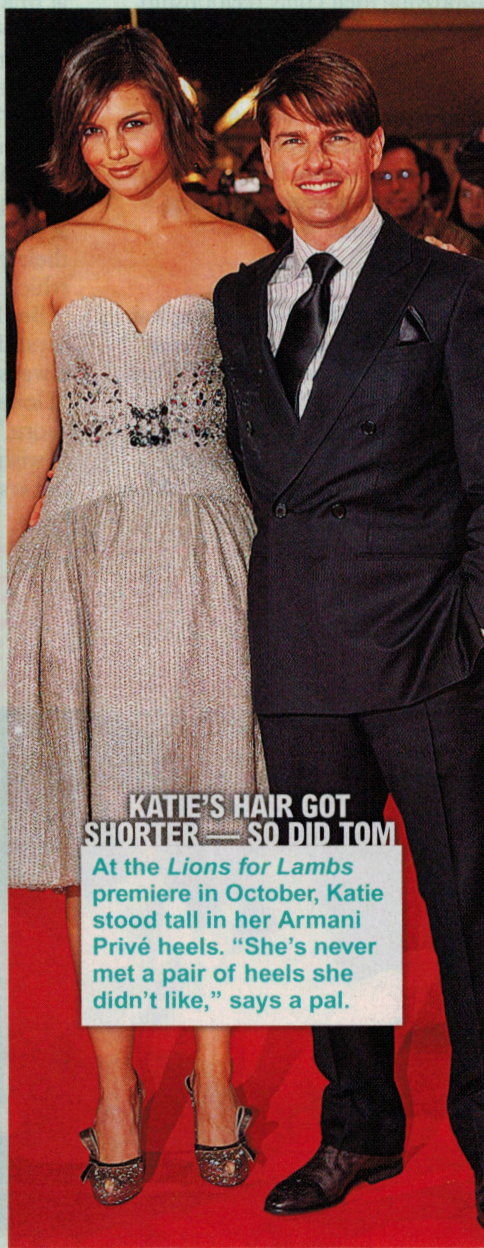

OF TOM AND KATIE'S RELATIONSHIP

Fans often remark that their favorite stars are "so much shorter in person" and that's especially true for 5'7" Tom. But ever since he married 5'9" Katie Holmes, 28, Tom actually appears to be getting shorter! However, friends say that it's just because Katie refuses to give up her high heels. "It's his issue, not hers," an insider says. "Tom's a giant in her eyes anyway."

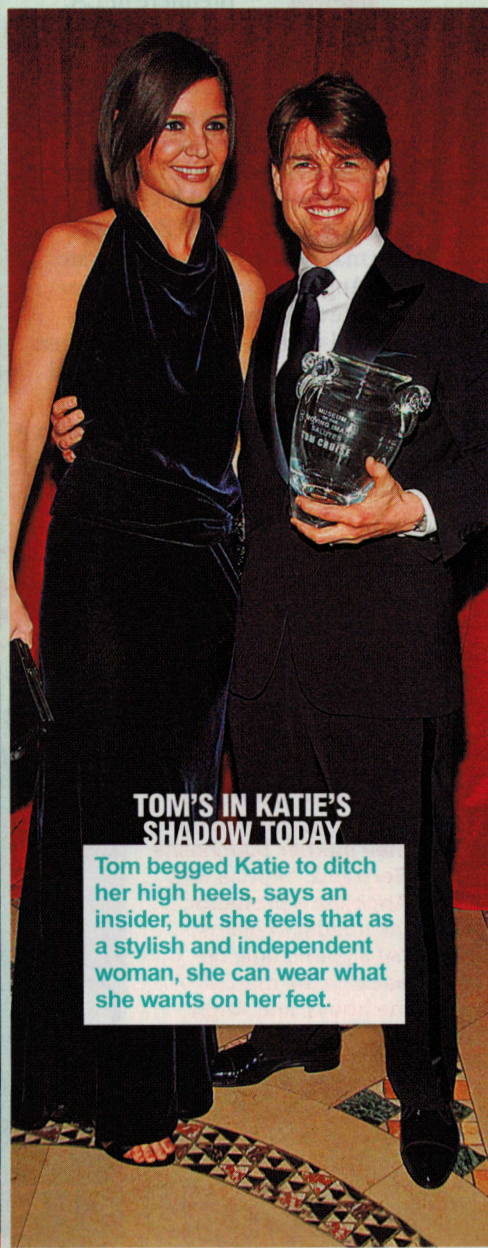

HE STARTED LOSING INCHES IN APRIL

Even though Katie's in heels, Tom is just a hair shorter, lending credence to the rumors that he sometimes wears lifts in his shoes.

KATIE'S HAIR GOT SHORTER—SO DID TOM

At the *Lions for Lambs* premiere in October, Katie stood tall in her Armani Privé heels. "She's never met a pair of heels she didn't like," says a pal.

TOM'S IN KATIE'S SHADOW TODAY

Tom begged Katie to ditch her high heels, says an insider, but she feels that as a stylish and independent woman, she can wear what she wants on her feet.

Angelina's torn between the men

Brad Pitt and Angelina Jolie's brother James Haven are in a tense competition for her attention

At the *Beowulf* premiere in LA, Angelina Jolie's older brother, James Haven, walked the red carpet and happily answered questions about Brad Pitt. "We've bonded amazingly," James told reporters. "He's fantastic — we get along great!" But the truth may not be as rosy. At a private party Angie held on November 5 to celebrate the movie's release, James and Brad stayed away from each other.

"The guys just don't get along, and now it's causing problems for Brad's relationship with Angelina," an insider says. "Angelina blames Brad for not warming up to her brother."

But James, 34, isn't interested in improving their chilly relationship. "He blames Brad for occupying so much of her time," the insider adds. "Plus, he thinks Brad is boring. Brad invited James out a few times for drinks, but he always turned him down. He sees Brad as a frat boy and not someone he'd ever be friends with."

James is her priority

Though Angelina, 32, is raising four children with Brad, 43, her closest confidant is still her brother. "When Angie and Brad fight, she shuts herself away in a bedroom for hours, pouring her heart out to James on the phone," explains a pal. "When

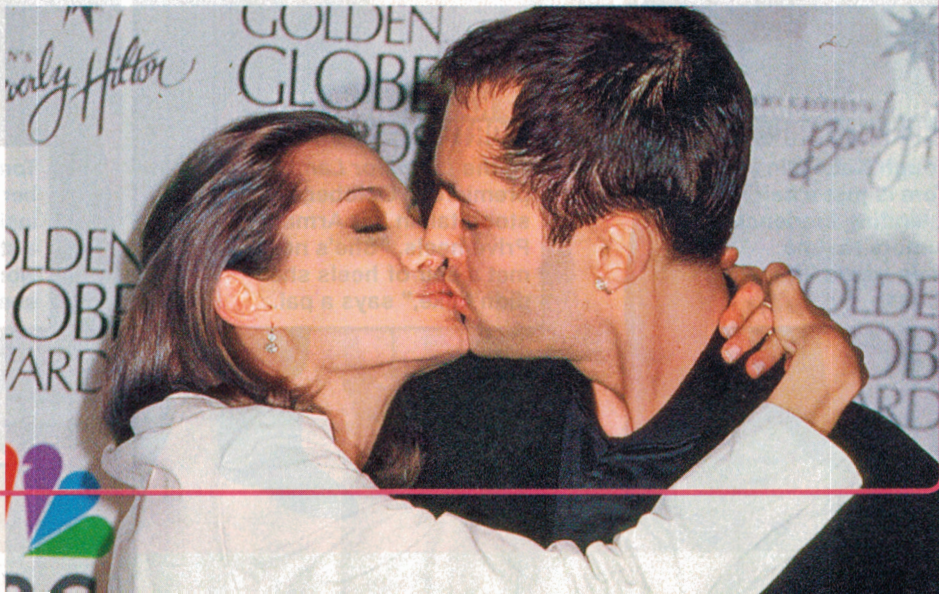

the argument is over, James looks at Brad funny the next time he sees him — as if he hasn't forgiven him for hurting his sister."

It's recently started to really bother Brad. "He used to grin and bear it as far as James goes," says the pal. "But now Brad thinks James needs to keep his mouth shut about his and Angelina's life. James butts into their lives by giving Angelina advice, which she listens to."

But Brad had better get over it, says a friend, because James will always be a big part of Angie's life. "I love Brad, but I love James even more," Angelina told the insider. "I wish they'd become better friends, but it's just not in the cards."

JAMES HAS ALWAYS BEEN THE MAIN MAN IN ANGELINA'S LIFE

Angie and James have been extremely close since they were kids, when their father, Jon Voight, left them and their mother, Marcheline Bertrand. "James was Angelina's protector," the insider explains. "At a young age, he became the man of the house and Angie has never forgotten that. Boyfriends and girlfriends, even their own father, come and go — so they have to be loyal to each other."

The birth family of Angelina Jolie's daughter is overcome with

When Angelina Jolie adopted her daughter Zahara from an Ethiopian orphanage, she was told the baby's mother had died of AIDS. But, as *In Touch* previously reported, a woman who claims to be Zahara's mother is very much alive — and now tells *In Touch* she's happy that the 2-year-old has found such a wonderful home.

"I'm happy to see my daughter in a better life, in a better place,"

Mentewab Dawit Lebiso, 24, told *In Touch*, after looking at pictures of Zahara with Angelina and Brad Pitt. "I just want the best life for her and for good things to happen to her," said Mentewab, who is currently recovering from typhoid.

"The one thing I do want is for Angelina to believe I'm alive," she says, adding that Zahara "must know her country, she must know her birth family. That is where her identity is."

A tragedy averted

As *In Touch* revealed, Mentewab says she ran away from home in the first months of Zahara's life because she was too poor to feed her. Unable to cope alone, Mentewab's mother, Almaz, brought the child to a local official who contacted Wide Horizons for Children, an adoption agency. Although Almaz insists she told the official that her daughter had run away, Zahara's legal papers claim

that her mother had died.

Today, Almaz expresses amazement at the beautiful child Zahara has become: "She looks much healthier now and she's got a lovely baby face." Of Angelina and Zahara, she says, "They look like a natural mother and daughter." Almaz also approves of Angelina's work as a U.N. Goodwill Ambassador. "I wish her good luck wherever she goes," she says, "but I also want her to look up to Ethiopia and my family."

"I abandoned my child because of poverty, but I'm still her mother and Angelina cannot deny that," says Mentewab.

ANGELINA'S ADOPTION SCANDAL CONTINUES

After *In Touch*'s story on Zahara's birth family was published, the adoption agency Wide Horizons for Children insisted that although Almaz is Zahara's grandmother, her daughter Mentewab is not the child's mother. The agency also called federal police to investigate Almaz's claim that she never said Zahara's mother was dead. "The government has to clarify the matter," Dr. Berhe Tsegaye (right), WHC's Ethiopian head, tells *In Touch*. "We have told the government what she is doing and [that it] has to take action now because it is the government whom she's made to look foolish." He also insists that Angelina's adoption is legal and irrevocable because Zahara was technically an orphan. "Even if the mother is alive, if she abandoned her baby, we have the right to put her up for adoption," Dr. Tsegaye adds.

Brody: Spencer and I are friends again

It looks like one of *The Hills*' feuds has come to an end! Brody Jenner confirmed in an interview with Canada's *eTalk* program that he and his former best friend, Spencer Pratt, have made amends. "He has finally reached out to me, and I gave him a call," says Brody, who had famously joined Team Lauren during season two. Brody's friend and fellow *Hills* star Frankie Delgado got the reunion going after running into Spencer, 24. "He text-messed me the other day and said, 'Tell Brody I really apologize and I really want our friendship to come back,'" Frankie says.

It seems like Spencer's apology worked. Brody, 24, even admitted that he will attend Heidi and Spencer's upcoming wedding. "I'll support him no matter what he does," Brody says. Spencer confirms the reunion to *In Touch*: "We will always be friends."

Jeffrey Feldman, who interviewed Brody, tells *In Touch*, "He was very sincere. When he spoke of Spencer, it was honest."

Matthew's the new Jay-Z!

Movie star and surfer dude Matthew McConaughey has added a new job to his résumé: music producer. The hunky star heard the music of reggae recording artist Mishka from his pal Cole Hauser and couldn't believe his ears. "I thought 'I gotta find

this cat,'" Matthew tells *In Touch*. The *We Are Marshall* star was so inspired by Mishka's music that the actor tracked him down and decided to start a label. Matthew, 38, is producing Mishka's album, *Above the Bones*, and will release it on his new

MySpace page, myspace.com/officialmconaughey, and on matthewmconaughey.com.

◀ Matthew's label, J.k. livin records, will sign more artists after the release of Mishka's *Above the Bones* on January 29.

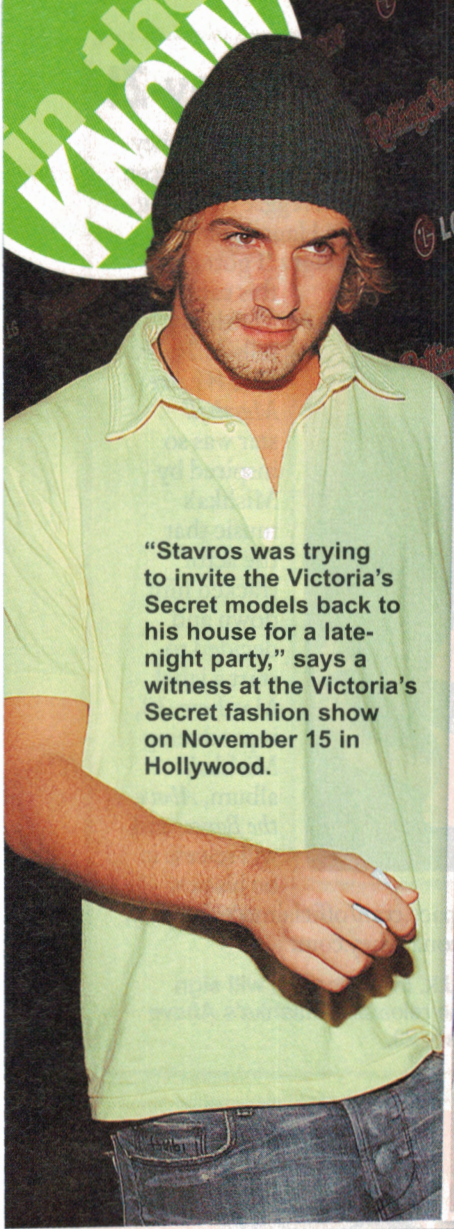

Criss Angel has a new galpal

Magician Criss Angel cast a love spell on *Las Vegas* star Camille Guaty — and it worked! Criss, 39, and Camille, 29, showed up together at the Dussault store opening in LA on November 8, telling friends they met in a bar the night before. A day later, Criss took Camille to Las Vegas for a weekend getaway and they walked hand in hand at the Koi Las Vegas opening at Planet Hollywood. "They were definitely a couple. They were smiling nonstop and they didn't stop holding hands the entire night," eyewitness Cheryl Holt tells *In Touch*. Later, the pair were seen partying at the Maroon 5 after-party at The Palms Casino Resort.

► "They were laughing and kissing. It was very sweet," says a witness of Camille and Criss.

Criss separated from Joanne Winkhart in 2006 and has also been linked with Cameron Diaz and Britney Spears.

"Stavros was trying to invite the Victoria's Secret models back to his house for a late-night party," says a witness at the Victoria's Secret fashion show on November 15 in Hollywood.

"Mary-Kate has wanted him back for a while," an insider tells *In Touch*.

Mary-Kate & Stavros reunite

It looks like Mary-Kate Olsen has rekindled her friendship with Stavros Niarchos. She was seen getting cozy with Stavros at Hyde lounge in LA on November 12. An onlooker tells *In Touch*, "They sat together and talked for most of the night." Although the two left separately, they both went to the same after-hours party, the insider adds. Mary-Kate, 21, was crushed when the two split. "I miss him and I love him, and I don't speak with him anymore," Mary-Kate told *W* magazine in 2005, after Stavros, 22, started dating Paris Hilton.

But he's also out with Petra

Stavros and Petra Nemcova, 28, were seen on November 10 getting close in Las Vegas — first at the grand opening of Koi restaurant in the Planet Hollywood Resort & Casino and then at the exclusive hotspot Noir Bar at the Luxor Hotel & Casino. "Stavros has had a crush on Petra for some time now, so he made his move when he ran into her at the Koi opening," says one of his pals.

Hayden's mom prefers her ex

Heroes star Hayden Panettiere is rumored to be happily dating co-star Milo Ventimiglia, but does her mother know something she doesn't? Hayden's mother, Lesley, recently told *In Touch* that her daughter's ex, Stephen Colletti of *Laguna Beach* fame, "is very respectful and is a sweet boy." She added that she trusted her daughter with him and wished they would get back together. The two dated for a year before parting ways in September. Maybe mom likes the idea that 21-year-old Stephen is closer to Hayden's age of 18 than 30-year-old Milo. So, the door may be open for Stephen to sweep her off her feet — again.

Milo, with Hayden, who says they're just friends, looked happy together on November 14 in LA.

Why use daily pills or weekly patches when NuvaRing® provides once-a-month birth control? Simply use one NuvaRing® for 3 weeks then replace it with a new ring after a one-week break. NuvaRing® provides a low and steady dose of hormones in a comfortable, flexible vaginal ring – for highly effective birth control all month. A little bit of freedom a lot of women are loving: NuvaRing®.

1-877-NUVARING www.nuvaring.com

IMPORTANT INFORMATION: NuvaRing® does not protect against HIV infection and other sexually transmitted diseases. The use of combination hormonal contraceptives is associated with increased risk of several serious side effects, including blood clots, which may lead to stroke or heart attack. The risk of getting blood clots may be greater with the type

of progestin in NuvaRing® than with some other progestins in certain low-dose birth control pills. It is unknown if the risk of blood clots is different with NuvaRing® than with the use of certain birth control pills. Cigarette smoking increases the risk of serious cardiovascular side effects, women who use combination hormonal contraceptives are strongly advised not to smoke.

Please see next page for additional important information.

Ask your healthcare provider about prescription-only NuvaRing®.

NUVARING®

(etonogestrel/ethinyl estradiol vaginal ring)

delivers 0.120 mg/0.015 mg per day

Read this leaflet carefully before you use NuvaRing® so that you understand the benefits and risks of using this form of birth control. The leaflet gives you information about the possible serious side effects of NuvaRing®. This leaflet will also tell you how to use NuvaRing® properly so that it will give you the best possible protection against pregnancy. Read the information you get whenever you get a new prescription or refill, because there may be new information. This information does not take the place of talking with your healthcare provider.

What is NuvaRing®?

NuvaRing® (NEW-vah-ring) is a flexible combined contraceptive vaginal ring. It is used to prevent pregnancy. It does not protect against HIV infection (AIDS) and other sexually transmitted diseases (STD's) such as chlamydia, genital herpes, genital warts, gonorrhea, hepatitis B, and syphilis. NuvaRing® contains a combination of a progestin and estrogen, two kinds of female hormones. You insert the ring in your vagina and leave it there for three weeks. After the ring is inserted, it releases a continuous low dose of hormones into your body. You then remove it for a one-week ring-free period. Contraceptives that contain both an estrogen and a progestin are called combination hormonal contraceptives. Most studies on combination contraceptives have used oral (taken by mouth) contraceptives. NuvaRing® may have the same risks that have been found for combination oral contraceptives. This leaflet will tell you about risks of taking combination oral contraceptives that may also apply to NuvaRing® users. In addition, it will tell you how to use NuvaRing® properly so that it will give you the best possible protection against pregnancy.

Who should not use NuvaRing®?

Cigarette smoking increases the risk of serious cardiovascular side effects when you use combination oral contraceptives. This risk increases even more if you are over age 35 and if you smoke 15 or more cigarettes a day. Women who use combination hormonal contraceptives, including NuvaRing®, are strongly advised not to smoke.

Do not use NuvaRing® if you have any of the following conditions: • pregnancy or suspected pregnancy • blood clots in your legs (thrombosis), lungs (pulmonary embolism), or eyes (now or in the past) • chest pain (angina pectoris) • heart attack or stroke • severe high blood pressure • diabetes with complications of the kidneys, eyes, nerves, or blood vessels • headaches with neurological symptoms • known or suspected breast cancer or cancer of the lining of the uterus, cervix, or vagina (now or in the past) • unexplained vaginal bleeding • yellowing of the whites of the eyes or of the skin (jaundice) during pregnancy or during past use of oral contraceptives (birth control pills) • liver tumors or active liver disease • disease of the heart valves with complications • need for a long period of bed rest following major surgery • an allergic reaction to any of the components of NuvaRing®. Tell your healthcare provider if you have ever had any of the conditions just listed. Your healthcare provider can suggest another method of birth control. Talk with your healthcare provider about when to start NuvaRing® if you are recovering from the birth of a child or a second trimester miscarriage or abortion or if you are breast-feeding. In addition, talk to your healthcare provider about using NuvaRing® if you have any of the following conditions. Women with any of these conditions should be checked often by their doctor or healthcare provider if they choose to use NuvaRing®: • a family history of breast cancer • breast nodules, fibrocystic disease, an abnormal breast x-ray, or abnormal mammogram • diabetes • high blood pressure • high cholesterol or triglycerides • headaches or epilepsy • mental depression • gallbladder or kidney disease • major surgery (You may need to stop using NuvaRing® for a while to reduce your chance of getting blood clots.) • any condition that makes the vagina get irritated easily • prolapsed (dropped) uterus, prolapsed bladder (cystocele), or rectal prolapse (rectocele) • severe constipation • history of toxic shock syndrome.

How should I use NuvaRing®?

For the best protection from pregnancy, use NuvaRing® exactly as directed. Insert one NuvaRing® in the vagina and keep it in place for three weeks in a row. Remove it for a one-week break and then insert a new ring. During the one-week break, you will usually have your menstrual period. Your healthcare provider should examine you at least once a year to see if there are any signs of side effects of NuvaRing® use.

When should I start NuvaRing®?

Follow the instructions in one of the sections below to find out when to start using NuvaRing®. If you did not use a hormonal contraceptive in the preceding cycle Insert NuvaRing® on the first day of your cycle, (i.e., the first day of menstrual bleeding). NuvaRing® will work immediately, it is not necessary to use an additional contraceptive method. You may also start on days 2-5 of your cycle, but in this case make sure you also use an extra method of birth control (barrier method), such as male condoms or spermicide for the first seven days of NuvaRing® use in the first cycle. If you are changing from a combined hormonal contraceptive pill or patch (containing both progestin and estrogen) Switch from your previous combined hormonal contraceptive on any day, but at the latest on the day following the usual hormone-free interval by inserting NuvaRing®. If you have been using your hormonal contraceptive method consistently and correctly, no extra birth control method should be needed. If you are changing from a progestagen-only method (minipill, implant or injection) or from a progestagen-releasing intrauterine system (IUS) You may switch on any day from a minipill. You should switch from an implant or the IUS on the day of its removal and from an injectable on the day when the next injection would be due. In all of these cases, you should use an extra method of birth control, such as a male condom or spermicide, for the first seven days of ring use. Following first trimester abortion or miscarriage If you start using NuvaRing® within five days after a complete first trimester abortion or miscarriage, you do not need to use an extra method of contraception. If NuvaRing® is not started within five days after a first trimester abortion or miscarriage, begin NuvaRing® at the time of your next menstrual period. Counting the first day of your menstrual period as "Day 1", insert NuvaRing® on or before Day 5 of the cycle, even if you have not finished bleeding. During this first cycle, use an extra method of birth control, such as male condoms or spermicide, for the first seven days of ring use.

When do I insert a new ring?

After no more than a one-week ring-free break, insert a new ring on the same day of the week as it was removed in the last cycle. If the ring-free interval has been extended beyond one week, the possibility of pregnancy should be considered, and an extra method of birth control, such as male condoms or spermicide, MUST be used until NuvaRing® has been used continuously for seven days.

If NuvaRing® slips out:

NuvaRing® can accidentally slip out of the vagina while removing a tampon, during intercourse, or straining during a bowel movement. If NuvaRing® slips out of the vagina and it has been out for less than three hours, you should still be protected from pregnancy. NuvaRing® can be rinsed with cool to lukewarm (not hot) water and reinserted as soon as possible, and at the latest within three hours of removal or expulsion (slipping out). If NuvaRing® is out of the vagina for more than three continuous hours: During Weeks 1 and 2: If the ring has been out of the vagina for more than three continuous hours during the 1st or 2nd week of use, contraceptive effectiveness may be reduced. Reinsert ring as soon as you remember and use an extra method of birth control, such as male condoms or spermicide, until the ring has been used continuously for seven days. During Week 3: If NuvaRing® slips out of the vagina for more than three continuous hours during the 3rd week of the three-week use period, throw the ring away and choose one of the following two options. 1. Insert a new ring immediately. Inserting a new ring will start the next three-week use period. You may not experience a period from your previous cycle. However, breakthrough spotting or bleeding may occur. 2. Have your period and insert a new ring no later than seven days (7x24 hours) from the time the previous ring was removed or expelled. This option should only be chosen if the ring was used continuously for the preceding seven days. In addition, a barrier method such as condoms or spermicides must be used until the ring has been used continuously for seven days. Women with conditions affecting the vagina, such as a prolapsed (dropped) uterus, may be more likely to have NuvaRing® slip out of the vagina. If NuvaRing® slips out repeatedly, you should consult with your healthcare provider.

If NuvaRing® is in your vagina too long:

If NuvaRing® has been left in your vagina for an extra week or less (four weeks total or less), you will remain protected. Remove NuvaRing® and insert a new ring after a one-week ring-free break. If NuvaRing® has been left in place for more than four weeks, you may not be adequately protected from pregnancy and you must check to be sure you are not pregnant. You MUST use an extra method of birth control, such as male condoms or spermicide, until the new NuvaRing® has been in place for seven days in a row.

If you miss a menstrual period:

You must check to be sure that you are not pregnant if: 1. you miss a period and NuvaRing® was out of the vagina for more than three hours during the three weeks of ring use; 2. you miss a period and waited longer than one week to insert a new ring; 3. you have followed the instructions and you miss two periods in a row; 4. you have left NuvaRing® in place for longer than four weeks.

Can I use tampons when using NuvaRing®?

Use of tampons will not reduce the contraceptive efficacy of NuvaRing®. Insert NuvaRing® before inserting a tampon. You should pay particular attention when removing a tampon to be sure that the ring is not accidentally pulled out. If this should occur, simply rinse the ring in cool to lukewarm (not hot) water and immediately reinsert it.

Can I use vaginal medications?

Use of spermicides or vaginal yeast products will not reduce the contraceptive efficacy of NuvaRing®.

What should I do if my NuvaRing® disconnects?

There have been reported cases of NuvaRing® disconnecting at the weld joint causing the ring to change shape and straighten out. This is not expected to affect the contraceptive effectiveness of NuvaRing®. If NuvaRing® disconnects, expulsion (slipping out) is more likely to occur (see "If NuvaRing® slips out"). If you discover the ring has disconnected, you should discard the ring and replace it with a new ring.

Overdose

NuvaRing® is unlikely to cause an overdose because the ring holding the medicine releases a steady amount of contraceptive hormones. Do not use more than one ring at a time. Overdose of combination hormonal contraceptives may cause nausea, vomiting, or vaginal bleeding.

What should I avoid while using NuvaRing®?

Cigarette smoking increases the risk of serious cardiovascular side effects when you use combination oral contraceptives, including NuvaRing®. This risk increases even more if you are over age 35 and if you smoke 15 or more cigarettes a day. Women who use combination hormonal contraceptives, like NuvaRing®, are strongly advised not to smoke. Do not breast-feed while using NuvaRing®. Some of the medicine may pass through the milk to the baby and could cause yellowing of the skin (jaundice) and breast enlargement in your baby. NuvaRing® could also decrease the amount and quality of your breast milk. The hormones in NuvaRing® can interact with many other medicines and herbal supplements. Tell your healthcare provider about any medicines you are taking, including prescription medicines, over-the-counter medicines, herbal remedies, and vitamins. The blood levels of the hormones released by NuvaRing® were increased when women used a vaginal medication (miconazole nitrate) for a yeast infection while NuvaRing® was in place. The pregnancy protection of NuvaRing® is not likely to be changed by use of these products. The blood levels of these hormones were not changed when women used vaginal, water-based spermicides (nonoxonyl or N-9 products) along with NuvaRing®. Certain drugs and herbal supplements may interact with combined hormonal contraceptives to make them less effective in preventing pregnancy or cause an increase in breakthrough bleeding. Such drugs include rifampin, drugs used for epilepsy such as barbiturates (for example, phenobarbital), carbamazepine, and phenytoin, primidone, topiramate, phenylbutazone, modafinil, and some drugs used for HIV such as ritonavir. Pregnancies and breakthrough bleeding have been reported by users of combined hormonal contraceptives who also used the herbal supplement St. John's Wort. You may need to use a non-hormonal method of contraception during any cycle in which you take drugs that can make oral contraceptives less effective. Be sure to tell your healthcare provider if you are taking or start taking any other medications, including non-prescription products or herbal products while using NuvaRing®. While using NuvaRing®, you should not rely upon a diaphragm when you need a back-up method of birth control because NuvaRing® may interfere with the correct placement and position of a diaphragm. If you are scheduled for any laboratory tests, tell your doctor or healthcare provider you are using NuvaRing®. Contraceptive hormones may change certain blood tests results.

What are the possible risks and side effects of NuvaRing®?

• **Blood clots** The hormones in NuvaRing® may cause changes in your blood clotting system which may allow your blood to clot more easily. If blood clots form in your legs, they can travel to the lungs and cause a sudden blockage of a vessel carrying blood to the lungs. Rarely, clots occur in the blood vessels of the eye and may cause blindness, double vision, or other vision problems. The risk of getting blood clots may be greater with the type of progestin in NuvaRing® than with some other progestins in certain low-dose birth control pills. It is unknown if the risk of blood clots is different with NuvaRing® use than with the use of certain birth control pills. • **Strokes and heart attacks** Hormonal contraceptives may increase your risk of strokes (blockage of blood flow to the brain) or heart attacks (blockage of blood flow to the heart). Any of these conditions can cause death or serious disability. Smoking greatly increases the risk of having strokes and heart attacks. Furthermore, smoking and the use of combination hormonal contraceptives, like NuvaRing®, greatly increases the chances of developing and dying of heart disease. If you use combination hormonal contraceptives, including NuvaRing®, you should not smoke. • **High blood pressure and heart disease** Combination hormonal contraceptives, including NuvaRing®, can worsen conditions like high blood pressure, diabetes, and problems with cholesterol and triglycerides. • **Cancer of the breast** Various studies give conflicting reports on the relationship between breast cancer and hormonal contraceptive use. Combination hormonal contraceptives, including NuvaRing®, may slightly increase your chance of having breast cancer diagnosed. After you stop using hormonal contraceptives, the chance of having breast cancer diagnosed begins to go back down. You should have regular breast examinations by a healthcare provider and examine your own breasts monthly. Tell your healthcare provider if you have a family history of breast cancer or if you have had breast nodules or an abnormal mammogram. • **Gallbladder disease** Combination hormonal contraceptive users may have a higher chance of having gallbladder disease. • **Liver tumors** In rare cases, combination hormonal contraceptives, like NuvaRing®, can cause non-cancerous (benign) but dangerous liver tumors. These benign liver tumors can break and cause fatal internal bleeding. In addition, it is possible that women who use combination hormonal contraceptives, like NuvaRing®, have a higher chance of getting liver cancer. However, liver cancers are extremely rare. The common side effects reported by NuvaRing® users are: vaginal infections and irritation • vaginal secretion • headache • weight gain • nausea. In addition to the risks and side effects listed above, users of combination hormonal contraceptives have reported the following side effects: • vomiting • change in appetite • abdominal cramps and bloating • breast tenderness or enlargement • irregular vaginal bleeding or spotting • changes in menstrual cycle • temporary infertility after treatment • fluid retention (edema) • spotty darkening of the skin, particularly on the face • rash • weight changes • depression • intolerance to contact lenses. Call your healthcare provider right away if you get any of the symptoms listed below. They may be signs of a serious problem: • sharp chest pain, coughing blood, or sudden shortness of breath (possible clot in the lung) • pain in the calf (back of lower leg; possible clot in the leg) • crushing chest pain or heaviness in the chest (possible heart attack) • sudden severe headache or vomiting, dizziness or fainting, problems with vision or speech, weakness, or numbness in an arm or leg (possible stroke) • sudden partial or complete loss of vision (possible clot in the eye) • yellowing of the skin or whites of the eyes (jaundice), especially with fever, tiredness, loss of appetite, dark colored urine, or light colored bowel movements (possible liver problems) • severe pain, swelling, or tenderness in the abdomen (gallbladder or liver problems) • sudden fever (usually 102°F or more), vomiting, diarrhea, dizziness, fainting, or a sunburn-like rash on the face or body (very rarely, toxic shock syndrome) • breast lumps (possible breast cancer or benign breast disease) • irregular vaginal bleeding or spotting that happens in more than one menstrual cycle or lasts for more than a few days • swelling (edema) of your fingers or ankles • difficulty in sleeping, weakness, lack of energy, fatigue, or a change in mood (possible severe depression).

How effective is NuvaRing®?

If NuvaRing® is used according to the directions, your chance of getting pregnant is about 1 to 2% a year. This means that, for every 100 women who use NuvaRing® for a year, one or two will become pregnant. Your chance of getting pregnant increases if NuvaRing® is not used exactly according to the directions. By comparison, the chances of getting pregnant in the first year of typical use (not always following directions exactly) of other methods of birth control are as follows: No birth control method: 85%; Spermicides alone: 26%; Periodic abstinence methods (calendar, ovulation, thermometer): 25%; Withdrawal: 19%; Cervical Cap with spermicides: 20 to 40%; Vaginal sponge: 20 to 40%; Diaphragm with spermicides: 20%; Condom alone (male): 14%; Condom alone (female): 21%; Oral contraceptives: 5%; IUD: less than 1 to 2%; Implants: less than 1%; Injection: less than 1%; Sterilization: less than 1%.

Other Information

• Store NuvaRing® at room temperature, 25°C (77°F). Temperatures can be from 59–86°F (15–30°C). Avoid direct sunlight or storing above 86°F (30°C). • Medicines are sometimes prescribed for conditions that are not mentioned in patient information leaflets. Do not use NuvaRing® for a condition for which it was not prescribed. Do not give NuvaRing® to anyone else who may want to use it. • Place the used ring in the reclosable foil pouch and properly dispose of it in a waste receptacle out of the reach of children and pets. This leaflet summarizes the most important information about NuvaRing®. If you would like more information, talk with your healthcare provider. You can ask your pharmacist or healthcare provider for information about NuvaRing® that is written for health professionals.

Nicole's plan to help kids in need

As the daughter of a pop legend, Nicole Richie had a charmed childhood. Now she wants to share her good fortune with others. Instead of asking for gifts at her November 18 baby shower, Nicole is requesting that her guests make donations to her and fiancé Joel Madden's new charity, the Richie-Madden Children's Foundation, which supports underprivileged mothers. Nicole, 26, also asked guests to bring books to the party so she and Joel, 28, can start a library for their son, who is due in January. Looks like Baby Madden will be off to a smart start!

"We're just excited and happy. It's great!" Joel tells *In Touch*.

We would love for you to bring a book to start a library for Baby Madden! In lieu of any other gift, we would be thrilled if you could make a donation to the

PEOPLE WHO CARE AS MUCH ABOUT REAL PEOPLE AS CELEBRITIES, YOU RULE.

Without you we'd all be screwed. So you've inspired us to set up a program called The RE*Generation. It allows people to make a difference right now in the lives of young homeless people by simply downloading a ringtone, texting to donate clothes and money, or volunteering time — it's that easy. And hey, there's no time like the present — November is National Homeless Youth Awareness Month and the fact that there are over 1 million young people living on the street has to change! There are a lot of problems in the world, and we may not be able to solve all of them, but with your help we can put a big, freakin' dent in one that's right here at home.

Halle's baby gift to Gabriel

Halle Berry bought her boyfriend, model Gabriel Aubry, a present to celebrate their baby-to-be — a new Mercedes-Benz. Gabriel has wanted to marry Halle since they found out she was expecting, says an insider, but Halle's vowed never to wed again. The 41-year-old

actress bought Gabriel, 31, the car as a way of showing she loves him without a ring. Her baby's daddy received a fully loaded S600 sedan that lists for more than \$150,000. "Gabriel loves the car," the insider says. "He just can't wait to drive Halle and their baby around in it."

Rick and Pam, 40, tied the knot in Las Vegas at the Mirage hotel on October 6.

Secrets about Pamela's man

Rick and Paris' sex tape, *1 Night In Paris*, was released in June 2004.

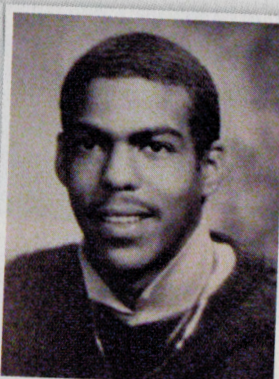

Rick Salomon gained fame as Paris Hilton's 2004 sex tape co-star, but according to an interview, his bad-boy behavior goes back as far as childhood. Pamela Anderson's new hubby left his New Jersey home as a young teen for a life of partying, girls and drugs in L.A. Even after two failed marriages and two young children, the playboy has seemingly refused to cease all of his hard-partying ways. Rick, 39, boasts that he has "40 or 50" sex tapes with high-profile women, and even claimed that he watched Paris' tape with his pals — and in front of Pamela! As *In Touch* previously reported, the pair's marriage has gotten off to a rocky start. But if the *Baywatch* babe is having second thoughts, perhaps Rick's private life is to blame.

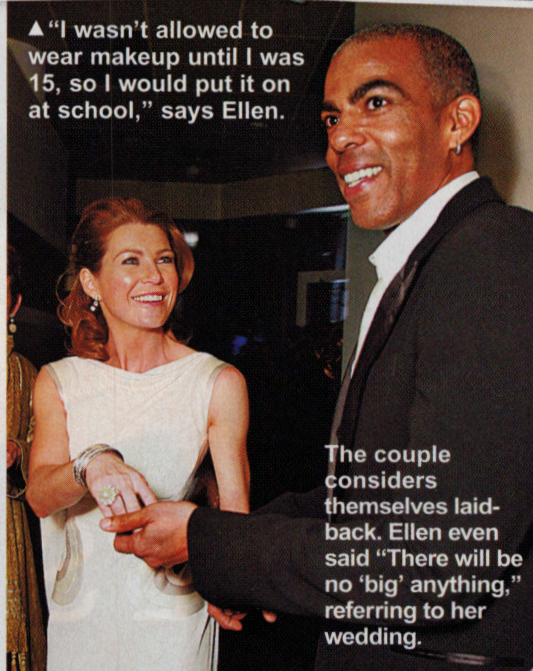

Pamela's rep insists that the couple is not having trouble.

Ellen & Chris: The early years

Long before they were on the red carpet, newlyweds Ellen Pompeo and Chris Ivey were normal high school students. *In Touch* has exclusive yearbook photos of the two in their teen years, and even though they grew up just miles from one another, the Massachusetts natives didn't meet until years later in an LA supermarket. They dated for three years and were engaged in the fall of 2006, after which Ellen, 38, made multiple statements saying she and Chris, 39, wanted a quiet wedding. Sticking to their word, they had a quick ceremony at New York's City Hall on November 9. Mayor Michael Bloomberg, a Boston native, served as the couple's witness.

▲ "I wasn't allowed to wear makeup until I was 15, so I would put it on at school," says Ellen.

The couple considers themselves laid-back. Ellen even said "There will be no 'big' anything," referring to her wedding.

Brooke: It's a boy

Brooke Burke and her fiancé, *Baywatch* star David Charvet, are expecting their second child together in March — a boy! An insider exclusively tells *In Touch*, "Brooke and David are so excited to have a boy to watch over all of their girls." Brooke, 36, and David, 35, are planning to live in Malibu and raise their kids there, the insider adds. The pair welcomed their first child, a girl, Heaven, in January. Brooke has two other daughters, Neriah, 7, and Sierra, 5, from her previous marriage to *Extreme Makeover* plastic surgeon Garth Fisher.

◀ "I'd love to have a son," Brooke told *Fit Pregnancy* magazine for the February/March issue.

"She doesn't have many friends because she doesn't know how to be a friend," says an insider.

WHY EVERYONE'S SHUTTING BRITNEY OUT

Britney Spears is learning the hard way that money can't buy real friendship

She used to spend her days surrounded by an entourage, but as she rushed into the lobby of Beverly Hills' Four Seasons hotel, Britney Spears had only one companion — close pal Sam Lutfi. And he was just standing there watching her weep over her second car mishap in less than a month. "She looked very upset," says a witness, who saw her run over a photographer's foot on November 14. "She was crying."

Despite reaching the top of the record charts recently, Britney's personal problems, including her messy custody battle with her ex Kevin Federline, have driven all of her onetime friends away. "She is desperate for friends," says an insider. "The girl has no one."

Her efforts to make new friends are not paying off. "Britney is like the kid in the class who buys presents for everyone to be popular," says a pal, who adds that, though

They've all had a problem with her

THE TRUCE IS OVER

Britney finally let her mother, Lynne, back into her life, but the pop star still won't listen to her.

SHE COULDN'T DEAL

Original assistant Felicia Culotta gave up on Brit and quit. "There's just so much you can do," Felicia said.

PARIS IS TOO BUSY

Paris Hilton and Britney went out in LA and Vegas. Their friendship only lasted a couple of months.

SHE'S OVER BRITNEY

Lindsay Lohan isn't likely to be in clubs with Brit anymore now that she's emerged from rehab.

RYAN HURT HER

Ryan Seacrest grilled Britney about her kids on his radio show, which an insider says made Brit cry.

SHE HAS A NEW LIFE

Cousin Laura Lynne Covington, an aspiring actress, has distanced herself from Britney.

HE'S TOO FAR AWAY

She blamed her poor VMA performance on Justin Timberlake, who's too busy with his own career to care.

LARRY GAVE UP

Britney rehired manager Larry Rudolph after her split from Kevin, then fired him again in April.

HEIDI WAS ANNOYED

Heidi Klum complained on Ellen DeGeneres' show that Britney had crashed her Halloween party.

HER LAWYER QUIT

Laura Wasser reportedly resigned as Brit's divorce lawyer because the pop star refused to take her advice.

JEFF GAVE UP, TOO

Manager Jeff Kwatinetz of The Firm parted ways with Britney after her disastrous performance at the VMAs.

SHE SQUEALED

Former assistant Kalie Machado quit Britney's team and told a tabloid, "she needs mental help."

the 25-year-old has been buying baby gifts for pregnant Nicole Richie, she was hurt that she wasn't invited to her shower. "Paris Hilton and Nicole are not really there for her. She is at an all-time low in terms of people in her life."

She's self-centered

Britney needs support more than ever. Fighting to regain custody of Sean Preston, 2, and Jayden, 14 months,

she allegedly failed a court-ordered drug test, according to tmz.com. Those close to Britney reportedly called it a false positive. On November 16, the court ruled that she is no longer allowed to drive with her boys in the car after she was videotaped blowing through a red light with them in the backseat. "It's just too much drama hanging out with Britney," says a pal. "Plus, all she ever wants to talk about is herself."

Her self-involvement seems to play a big part in driving others away. "It's all self-imposed," says psychologist Dr. Joyce Brothers, who does not treat Britney. "She appears to have no concern for others."

Britney has become a cliché — the poor little rich girl, the insider adds. "She can buy whatever she wants, except for the one thing she needs — and that's friends."

Lindsay & Riley on the

Riley's making all the effort

"They're over the honeymoon phase," says a friend. Riley, a pro snowboarder who lives full-time in Utah, has been doing all of the traveling to spend time with Lindsay.

Lindsay

rocks!

Lindsay Lohan's new boyfriend is fed up with her busy LA lifestyle

Since leaving rehab, Lindsay Lohan has been easing back into the Hollywood scene, but it seems that her fast-paced lifestyle might be too much for her laid-back boyfriend, Riley Giles. "Lindsay is so hectic and demanding," says a friend. "She and Riley have been fighting a lot and I think that both of them are getting annoyed."

Lindsay, 21, met Riley, 25, while both attended rehab at Cirque Lodge in Sundance, Utah. In that simpler place, it was easy to fall in love. "Riley was her entire world," says a friend.

Since she returned to LA in October, Lindsay has steered clear of nightclubs — but she has plunged straight back into the life of an A-list star. And Riley, who flew to LA on November 15, is startled by the change in her personality. "When he comes to visit Lindsay, it's always mayhem," says the friend. "He hates the

spotlight, but she loves the attention."

She's tried to include Riley when she joins friends for dinner, but he'd rather be alone with her. "Riley doesn't know any of them," says the pal. "It's awkward when they all go out."

The couple hasn't given up on their romance yet, but it's not surprising that they're already having trouble. Experts warn that two people in the early stages of drug or alcohol recovery should avoid romantic entanglements.

"It's a disaster to meet someone in a treatment center because romance supersedes recovery," explains therapist Dr. James Wood, who does not treat the couple.

That may be true, but the strain of the spotlight might be an even bigger challenge than sobriety for this couple. Riley was expected to spend Thanksgiving with Lindsay and her family, but a pal says, "Who knows how long they're going to last?"

He doesn't understand her priorities

Riley, who'd flown in from Utah, was stuck cooling his heels while Lindsay got hair extensions at Ken Pavés' Beverly Hills salon on November 3. "He was waiting for her and seemed bored," says an insider. "It took a long time."

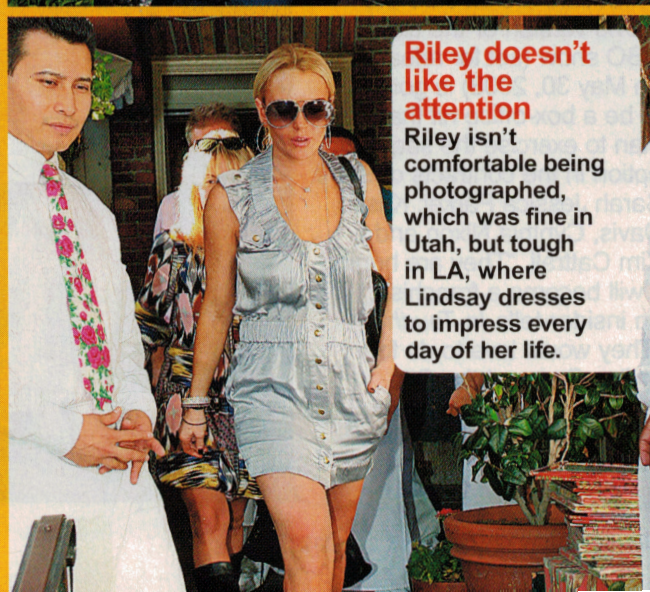

Lindsay's hanging out with her old friends

In LA, Riley has to share her time with pals like Samantha Ronson. "Sam is one of Lindsay's closest friends," says an insider. "They have fun."

Riley doesn't like the attention

Riley isn't comfortable being photographed, which was fine in Utah, but tough in LA, where Lindsay dresses to impress every day of her life.

She was in jail for just 84 minutes!

Lynwood women's jail, which housed Paris Hilton, received another famous inmate on November 15, when Lindsay checked in and was released a little more than an hour later. The actress, who also performed community service at the American Red Cross on November 12, needed to complete one day in jail and 10 days of service in relation to her DUI arrests in May and July.

Did Zac come back for Vanessa? "He had so many other offers," says an insider.

Zac & Vanessa's big payday

Zanessa fans, rejoice! Not only will Zac Efron and Vanessa Hudgens be back playing Troy and Gabriella in *High School Musical 3*, the real-life lovebirds will get huge pay raises to show for it. Although Disney released a statement saying they're "still in negotiation with the *High School Musical* cast," Zac was spotted lunching with *HSM* director Kenny Ortega — and an insider tells *In Touch* that the casts' deals are in place. "Zac will make \$3.2 million for the sequel, while Vanessa will get \$1.75 million," says the insider. The stars' sequel status had been up in the air after false reports that Vanessa's nude photo scandal had cost her the squeaky-clean role and Zac's Hollywood star took off following his scene-stealing turn in *Hairspray*. Filming is scheduled to begin in February.

Sex and the City movie: Sequels on the way!

They haven't even finished filming the *Sex and the City* movie yet, but Carrie, Charlotte, Miranda and Samantha have already got the green light for a sequel! Producers are so sure the movie version of the classic HBO show (set for release on May 30, 2008) is going to be a box-office hit that they plan to exercise the sequel option in the contracts of stars Sarah Jessica Parker, Kristin Davis, Cynthia Nixon and Kim Cattrall. "They are hoping it will become a franchise," an insider tells *In Touch*. "They would love to do four or five *Sex and the City* movies. Script ideas were even in the works before the writers' strike."

Charlotte, Carrie, Miranda and Samantha will return for more *Sex*!

Debi takes on *The View*

Entourage actress Debi Mazar has a lot to say — and she's ready to share it with the world on a new talk show she'll co-host with her friend Karen Duffy. "It is not *The View*," said Debi, who was working with MasterCard & Wal-Mart for their "Joy of Giving" promotion. "It's skewing a younger demographic, with more positive content to make people feel good about themselves. Duff and I have known each other more than 20 years, it's not like a couple of chicks sitting around fighting to see who gets the next word in." And yes, their celebrity pals will be guests. "Duff's best friend is George Clooney; my best friend is Madonna!" adds Debi, who's currently shopping around the project.

"I hosted *The View* and had the unfortunate opportunity to sit there while Barbara Walters decided to tell the world she didn't get the Paris Hilton [post-jail] interview," says Debi.

Shrek The Third is now
on DVD.

It's Santa Shrek!

Mike Myers, Cameron Diaz, Antonio Banderas and Eddie Murphy reprise their big-screen roles in this hilarious Christmas special *Shrek the Halls* (Wednesday, November 28, ABC, 8 p.m. ET). It seems everyone's favorite green ogre (now a family man) is feeling blue on Christmas Eve. Princess Fiona, Puss in Boots and Donkey help give him a dose of holiday spirit.

FATIGUE BLOATING MOODINESS ACNE

IMPORTANT SAFETY INFORMATION ABOUT YAZ:

What are the risks involved with taking any oral contraceptive (OC)? OCs can be associated with increased risks of several serious side effects. OCs do not protect against HIV infection or other STDs. Women, especially those 35 and over, are strongly advised not to smoke because it increases the risk of serious cardiovascular side effects including blood clots, stroke, and heart attack.

READY FOR BIRTH CONTROL THAT GOES BEYOND?

YAZ[®], like all birth control pills, is 99% effective and can give you shorter, lighter periods. But YAZ goes beyond the rest. It's the first and only contraceptive proven to treat emotional and physical premenstrual symptoms severe enough to impact your life, a condition doctors call PMDD. Symptoms could include:

- Irritability
- Moodiness
- Feeling anxious
- Bloating
- Increased appetite
- Fatigue
- Headaches
- Muscle aches

YAZ can also help keep your skin clear. In recent studies, 9 out of 10 women saw improvement in their moderate acne.

YAZ is for women who choose the Pill for contraception. It should be taken as directed, and is available by prescription only.

Who shouldn't take YAZ?

YAZ contains a different kind of hormone that may increase potassium. Therefore, you should not take YAZ if you have kidney, liver, or adrenal disease because this could cause serious heart and health problems. Tell your doctor if you are on daily long-term treatment for a chronic condition such as cardiovascular disease or chronic inflammatory disease. Women who take certain drugs (see below) should have their potassium levels checked in the first month of taking YAZ.

You don't have to take it anymore! Talk to your healthcare professional to find out if YAZ is right for you.

What cardiovascular or chronic inflammatory drugs may increase potassium? NSAIDs—ibuprofen (Motrin[®], Advil[®]), naproxen (Naprosyn[®], Aleve[®], and others) when taken long-term and daily for arthritis or other diseases or conditions, Potassium-sparing diuretics (spironolactone and others), Potassium supplementation, ACE inhibitors (Capoten[®], Vasotec[®], Zestril[®], and others), Angiotensin-II receptor antagonists (Cozaar[®], Diovan[®], Avapro[®], and others), Heparin, and Aldosterone antagonists. See important patient information on reverse side.

YAZ®

(drospirenone and ethinyl estradiol) Tablets
containing the following:
24 light pink – “active” tablets
4 white – “inert” tablets

This product (like all oral contraceptives) is intended to prevent pregnancy. It does not protect against HIV infection (AIDS) and other sexually transmitted diseases.

YAZ® is different from other birth control pills because it contains the progestin drospirenone. Drospirenone may increase potassium. Therefore, you should not take YAZ if you have kidney, liver or adrenal disease because this could cause serious heart and health problems. Other drugs may also increase potassium. If you are currently on daily, long-term treatment for a chronic condition with any of the medications below, you should consult your healthcare provider about whether YAZ is right for you, and during the first month that you take YAZ, you should have a blood test to check your potassium level.

- NSAIDs (ibuprofen [Motrin, Advil], naproxyn [Aleve and others] when taken long-term and daily for treatment of arthritis or other problems)
- Potassium-sparing diuretics (spironolactone and others)
- Potassium supplementation
- ACE inhibitors (Capoten, Vasotec, Zestril and others)
- Angiotensin-II receptor antagonists (Cozaar, Diovan, Avapro and others)
- Heparin
- Aldosterone antagonists

INDICATIONS

1. YAZ is indicated for the prevention of pregnancy in women who elect to use an oral contraceptive.
2. YAZ is also indicated for the treatment of symptoms of premenstrual dysphoric disorder (PMDD) in women who choose to use an oral contraceptive as their method of contraception. The effectiveness of YAZ for PMDD when used for more than three menstrual cycles has not been evaluated.
3. YAZ is indicated for the treatment of moderate acne vulgaris in women at least 14 years of age, who have no known contraindications to oral contraceptive therapy and have achieved menarche. YAZ should be used for the treatment of acne only if the patient desires an oral contraceptive for birth control.

YAZ is an oral contraceptive, also known as a “birth control pill” or “the Pill.” Oral contraceptives are taken to prevent pregnancy, and, when taken correctly without missing any pills, have a failure rate of approximately 1% per year (1 pregnancy per 100 women per year of use). The typical failure rate in pill users is approximately 5% per year (5 pregnancies per 100 women per year of use) when women who miss pills are included. Forgetting to take pills considerably increases the chances of pregnancy.

YAZ may also be taken to treat premenstrual dysphoric disorder (PMDD) if you choose to use the Pill for birth control. Unless you have already decided to use the Pill for birth control, you should not start YAZ to treat your PMDD because there are other medical therapies for PMDD that do not have the same risks as the Pill. PMDD is a mood disorder related to the menstrual cycle. PMDD significantly interferes with work or school, or with usual social activities and relationships with others. Symptoms include markedly depressed mood, anxiety or tension, mood swings, and persistent anger or irritability. Other features include decreased interest in usual activities, difficulty concentrating, lack of energy, change in appetite or sleep, and feeling out of control. Physical symptoms associated with PMDD may include breast tenderness, headache, joint and muscle pain, bloating and weight gain. These symptoms occur regularly before menstruation starts and go away within a few days following the start of the period. Diagnosis of PMDD should be made by healthcare providers.

You should only use YAZ for treatment of PMDD if you:

- Have already decided to use oral contraceptives for birth control, and
- Have been diagnosed with PMDD by your healthcare provider.

YAZ has not been shown to be effective for the treatment of premenstrual syndrome (PMS), a less serious cluster of symptoms occurring before menstruation. If you or your healthcare provider believes you have PMS, you should only take YAZ if you want to prevent pregnancy, and not for the treatment of PMS.

YAZ may also be taken to treat moderate acne in women who are able to and wish to use the pill for birth control.

Any woman who needs contraception (birth control) and chooses to use an oral contraceptive should understand the benefits and risks of using the Pill. This leaflet will give you much of the information you will need to help you decide if you should use the Pill for contraception and will also help you determine if you are at risk of developing any of the serious side effects of the Pill. It will tell you how to use the Pill properly so that it will be as effective as possible. However, this leaflet is not a replacement for a careful discussion between you and your healthcare professional. You should discuss the information provided in this leaflet with him or her, both when you first start taking the Pill and during your revisits. You should also follow your healthcare professional's advice with regard to regular check-up while you are on the Pill.

For the majority of women, oral contraceptives can be taken safely. But there are some women who are at high risk of developing certain serious diseases that can be life-threatening or may cause temporary or permanent disability or death. The risks associated with taking oral contraceptives increase significantly if you:

- smoke
- have high blood pressure, diabetes, high cholesterol, or are obese
- have or have had clotting disorders, heart attack, stroke, angina pectoris (severe chest pains), cancer of the breast or sex organs, jaundice, or malignant or benign liver tumors.

You should not take the pill if you suspect you are pregnant or have unexplained vaginal bleeding.

Although cardiovascular disease risks may be increased with oral contraceptive use after age 40 in healthy, non-smoking women (even with the newer low-dose formulations), there are also greater potential health risks associated with pregnancy in older women.

Cigarette smoking increases the risk of serious adverse effects on the heart and blood vessels from oral contraceptive use. This risk increases with age and with heavy smoking (15 or more cigarettes per day) and is quite marked in women over 35 years of age. Women who use oral contraceptives should not smoke.

Most side effects of the pill are not serious. The most common such effects are nausea, vomiting, bleeding between menstrual periods, weight gain, breast tenderness, and difficulty wearing contact lenses. These side effects, especially nausea and vomiting may subside within the first three months of use.

The serious side effects of the pill occur very infrequently, especially if you are in good health and are young. However, you should know that the following medical conditions have been associated with or made worse by the pill:

1. Blood clots in the legs (thrombophlebitis), lungs (pulmonary embolism), blockage or rupture of a blood vessel in the brain (stroke), blockage of blood vessels in the heart (heart attack and angina pectoris) or other organs of the body. As mentioned above, smoking increases the risk of heart attacks and strokes and subsequent serious medical consequences. Women with migraine headaches also may be at increased risk of stroke when taking the pill.
2. Liver tumors, which may rupture and cause severe bleeding. A possible but not definite association has been found with the pill and liver cancer. However, liver cancers are extremely rare. The chance of developing liver cancer from using the pill is thus even rarer.
3. High blood pressure, although blood pressure usually returns to normal when the pill is stopped.
4. Cancer of the breast. Various studies give conflicting reports on the relationship between breast cancer and oral contraceptive use. Oral contraceptive use may slightly increase your chance of having breast cancer diagnosed, particularly after using hormonal contraceptives at a younger age. After you stop using hormonal contraceptives, the chances of getting breast cancer begin to go back down. You should have regular breast examinations by a healthcare provider and examine your own breasts monthly. Tell your healthcare provider if you have a family history of breast cancer or if you have had breast nodules or an abnormal mammogram. Women who currently have or have had breast cancer should not use oral contraceptives because breast cancer is a hormone-sensitive tumor.

Some studies have found an increase in the incidence of cancer or precancerous lesions of the cervix in women who use the pill. However, this finding may be related to factors other than the use of the pill.

The symptoms associated with these serious side effects are discussed in the detailed leaflet given to you with your supply of pills. Notify your doctor or healthcare provider if you notice any unusual physical disturbances while taking the pill. In addition, drugs such as rifampin, as well as some anticonvulsants, some antibiotics and some herbal products such as St. John's Wort, may decrease oral contraceptive effectiveness.

Taking the pill may provide some important non-contraceptive benefits. These include less painful menstruation, less menstrual blood loss and anemia, fewer pelvic infections, and fewer cancers of the ovary and the lining of the uterus.

Be sure to discuss any medical condition you may have with your healthcare provider. Your healthcare provider will take a medical and family history before prescribing oral contraceptives and will examine you. The physical examination may be delayed to another time if you request it and the healthcare provider believes that it is appropriate to postpone it. You should be reexamined at least once a year while taking oral contraceptives. The detailed patient information booklet gives you further information which you should read and discuss with your healthcare provider.

This product (like all oral contraceptives) is intended to prevent pregnancy. Oral contraceptives do not protect against HIV infection (AIDS) and other sexually transmitted diseases such as chlamydia, genital herpes, genital warts, gonorrhea, hepatitis B, and syphilis.

INSTRUCTIONS TO PATIENTS**HOW TO TAKE THE PILL****IMPORTANT POINTS TO REMEMBER****BEFORE YOU START TAKING YOUR PILLS:**

1. BE SURE TO READ THESE DIRECTIONS:

Before you start taking your pills.

Anyone you are not sure what to do.

2. THE RIGHT WAY TO TAKE THE PILL IS TO TAKE ONE PILL EVERY DAY AT THE SAME TIME. YAZ CAN BE TAKEN WITHOUT REGARD TO MEALS.

If you miss pills you could get pregnant. This includes starting the pack late. The more pills you miss, the more likely you are to get pregnant. See “WHAT TO DO IF YOU MISS PILLS” below.

3. MANY WOMEN HAVE SPOTTING OR LIGHT BLEEDING, OR MAY FEEL SICK TO THEIR STOMACH DURING THE FIRST 1-3 PACKS OF PILLS.

If you do have spotting or light bleeding or feel sick to your stomach, do not stop taking the pill. The problem will usually go away. If it does not go away, check with your healthcare provider.

4. MISSING PILLS CAN ALSO CAUSE SPOTTING OR LIGHT BLEEDING, even when you make up these missed pills.

On the days you take two pills, to make up for missed pills, you could also feel a little sick to your stomach.

5. IF YOU HAVE VOMITING (within 3 to 4 hours after you take your pill), you should follow the instructions for “WHAT TO DO IF YOU MISS PILLS”. IF YOU HAVE DIARRHEA, OR IF YOU TAKE CERTAIN MEDICINES, including some antibiotics and some herbal products such as St. John's Wort, your pills may not work as well.

Use a back-up method (such as condoms or spermicides) until you check with your healthcare provider.

6. IF YOU HAVE TROUBLE REMEMBERING TO TAKE THE PILL, talk to your healthcare provider about how to make pill-taking easier or about using another method of birth control.

7. IF YOU HAVE ANY QUESTIONS OR ARE UNSURE ABOUT THE INFORMATION IN THIS LEAFLET, call your healthcare provider.

BEFORE YOU START TAKING YOUR PILLS

1. DECIDE WHAT TIME OF DAY YOU WANT TO TAKE YOUR PILL.

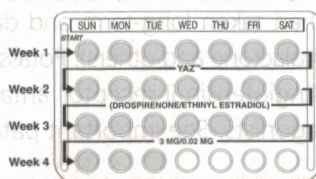

It is important to take YAZ at about the same time every day. YAZ can be taken without regard to meals.

2. LOOK AT YOUR PILL PACK: – IT HAS 28 PILLS:

The YAZ-pill pack has 24 light pink “active” pills (with hormones) to be taken for 24 days, followed by 4 white “reminder” pills (without hormones) to be taken for four days.

3. ALSO FIND:

- 1) Where on the pack to start taking pills,
- 2) In what order to take the pills (follow the arrows)
- 3) The week numbers as shown in the diagram below

4. BE SURE YOU HAVE READY AT ALL TIMES:

ANOTHER KIND OF BIRTH CONTROL (such as condoms or spermicides) to use as a back-up in case you miss pills.

AN EXTRA, FULL PILL PACK.

WHEN TO START THE FIRST PACK OF PILLS

You have a choice for which day to start taking your first pack of pills. Decide with your healthcare provider which is the best day for you. Pick a time of day which will be easy to remember.

DAY 1 START:

1. Take the first light pink “active” pill of the first pack during the first 24 hours of your period.

2. You will not need to use a back-up method of birth control, since you are starting the pill at the beginning of your period.

SUNDAY START:

1. Take the first light pink “active” pill of the first pack on the Sunday after your period starts, even if you are still bleeding. If your period begins on Sunday, start the pack that same day.

2. Use another method of birth control (such as condoms or spermicides) as a back-up method if you have sex anytime from the Sunday you start your first pack until the next Sunday (7 days).

WHEN YOU SWITCH FROM A DIFFERENT BIRTH CONTROL PILL

When switching from another birth control pill, YAZ should be started on the same day that a new pack of the previous birth control pills would have been started.

WHAT TO DO DURING THE MONTH

1. TAKE ONE PILL AT THE SAME TIME EVERY DAY UNTIL THE PACK IS EMPTY

Do not skip pills even if you are spotting or bleeding between monthly periods or feel sick to your stomach (nausea).

Do not skip pills even if you do not have sex very often.

2. WHEN YOU FINISH A PACK OF PILLS:

Start the next pack on the day after your last white “reminder” pill. Do not wait any days between packs.

WHAT TO DO IF YOU MISS PILLS

If you MISS 1 light pink “active” pill in Week 1 of your pack:

1. Take it as soon as you remember. Take the next pill at your regular time. This means you may take two pills in one day.

2. You do not need to use a back-up birth control method if you have sex.

If you MISS 2 light pink “active” pills in a row in WEEK 1 or WEEK 2 of your pack:

1. Take two pills on the day you remember and two pills the next day.
2. Then take one pill a day until you finish the pack.
3. You COULD BECOME PREGNANT if you have sex in the 7 days after you restart your pills. You MUST use another birth control method (such as condoms or spermicides) as a back-up for those 7 days.

If you MISS 2 light pink “active” pills in a row in WEEK 3 or Week 4 of your pack:

1. If you are a Day 1 Starter:

THROW OUT the rest of the pill pack and start a new pack that same day.

If you are a Sunday Starter:

Keep taking one pill every day until Sunday. On Sunday, THROW OUT the rest of the pack and start a new pack of pills that same day.

2. You COULD BECOME PREGNANT if you have sex in the 7 days after you restart your pills. You MUST use another birth control method (such as condoms or spermicides) as a back-up for those 7 days.

3. You may not have your period this month but this is expected. However, if you miss your period two months in a row, call your healthcare provider because you might be pregnant.

If you MISS 3 OR MORE light pink “active” pills in a row during ANY Week:

1. If you are a Day 1 Starter:

THROW OUT the rest of the pill pack and start a new pack that same day.

If you are a Sunday Starter:

Keep taking 1 pill every day until Sunday. On Sunday, THROW OUT the rest of the pack and start a new pack of pills that same day.

2. You COULD BECOME PREGNANT if you have sex in the 7 days after you restart pills. You MUST use another birth control method (such as condoms or spermicides) as a back-up for those 7 days.

3. You may not have your period this month but this is expected. However, if you miss your period two months in a row, call your healthcare provider because you might be pregnant.

If you MISS ANY of the 4 white “reminder” pills in Week 4:

THROW AWAY the pills you missed.

Keep taking one pill each day until the pack is empty.

You do not need a back-up method of birth control.

FINALLY, IF YOU ARE STILL NOT SURE WHAT TO DO ABOUT THE PILLS YOU HAVE MISSED:

Use a BACK-UP METHOD (such as condoms or spermicides) anytime you have sex.

KEEP TAKING ONE ACTIVE LIGHT PINK PILL EACH DAY until you can contact your healthcare provider.

CAMERON WAS STUCK IN HIS COSTUME

Before being eliminated on November 13, *All My Children*'s Cameron Mathison had one serious wardrobe malfunction. "I had to be cut out of my costume!" the 38-year-old reveals. "They like outfits to be formfitting, but I couldn't lift my arms. So they cut the pants — and my underwear — to free me!"

MARIE COLLAPSED AND FACED FAMILY PAIN

First, Marie Osmond fainted following a samba with her partner, Jonathan Roberts. Then, the 48-year-old's dad, George, passed away on November 6. A week later, Marie revealed that her son Michael, 16, checked into rehab. "It's been tough on so many levels," she says. But the cast fave is still going strong.

Marie's dad had nine children, 55 grandchildren and 48 great-grandchildren.

JENNIE TOOK QUITE A TUMBLE

Jennie Garth's been tough on herself all season, but when she slipped while quickstepping with partner Derek Hough in early October, the *Beverly Hills, 90210* star was devastated. "This was not what we planned," Jennie, 35, said tearfully. "Dress rehearsal went fine!" Since then, Jennie's back on her feet and wowing the judges.

Jane and her family were forced to evacuate their home in October.

The guests feel the curse, too

Jennifer Lopez and Gloria Estefan were affected, too. Jennifer, 38, had to pretape her guest appearance after her grandmother, Julia (right), passed away, and Gloria, 50, canceled when her mom, Gloria, had an intestinal rupture.

JANE LOST HER MOTHER AND ALMOST HER HOUSE

It was a bittersweet ride for Jane Seymour, who had an impressive seven-week run while dealing with the loss of her mother, Mieke, a nasty bout of food poisoning and Malibu fires blazing near her home. The 56-year-old Brit credits her co-stars with getting her through: "They couldn't have been kinder," she says.

Lindsay reportedly flew an expert in telekinesis to LA to give her lessons!

Does Lindsay want to become magnetic?

NO! She's already one of Hollywood's most attractive women, and now, Lindsay Lohan is reportedly taking lessons to become a human magnet by learning to move objects using only her mind. "I've always been interested in off-the-wall abilities. And this is a really interesting phenomenon," Lindsay said, according to London's *Daily Star*. "I'd love to find out more about it and try to pinpoint what causes these supernatural abilities." But a rep for the star calls the tale "a joke."

Is Jay-Z selling cosmetics?

YES! Jay-Z is a rapper, helped create the clothing line Rocawear, co-owns a NBA basketball team and is the CEO of two record labels — now gossips claim he is about to lend his business-savvy to a new line of perfumes and cosmetics

from Elizabeth Arden. "We are excited," Jay-Z confirmed in a statement. "The combination of their expertise in fragrance and our ability to affect popular culture will produce some incredible products."

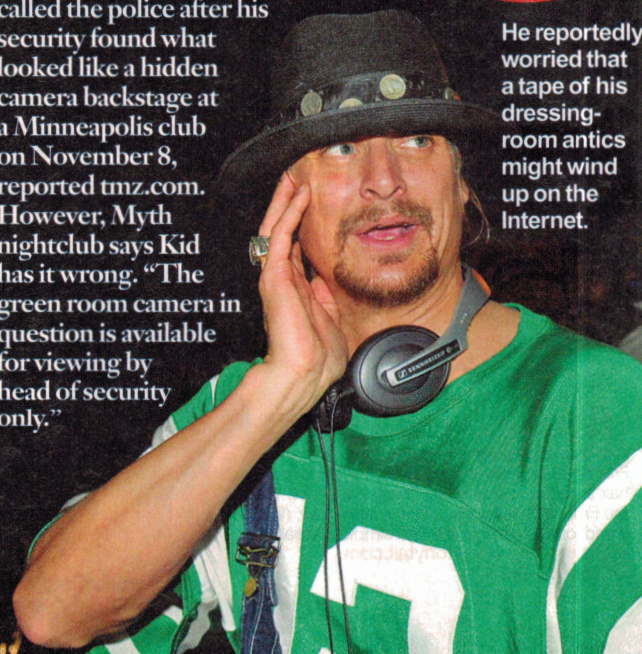

◀ **The first Rocawear cosmetics are due in stores in fall 2008.**

Was someone secretly recording Kid's dressing room?

NO! Kid Rock thought he was being filmed and called the police after his security found what looked like a hidden camera backstage at a Minneapolis club on November 8, reported *tmz.com*. However, Myth nightclub says Kid has it wrong. "The green room camera in question is available for viewing by head of security only."

He reportedly worried that a tape of his dressing-room antics might wind up on the Internet.

Does Brad want to buy Neverland Ranch?

An aerial photograph of the entrance to the Neverland section of Disneyland. The central feature is a large, circular clock face set into the lawn, with the word 'NEVERLAND' arched across the top. The clock face has numbers 1 through 12 and hands. Surrounding the clock are various statues and manicured hedges. In the background is a large, red-brick building with a central clock tower and multiple windows. The entire scene is set against a backdrop of green lawns and trees.

Did Jennifer call in a real ghost whisperer?

Does Kate wear size 11 shoes?

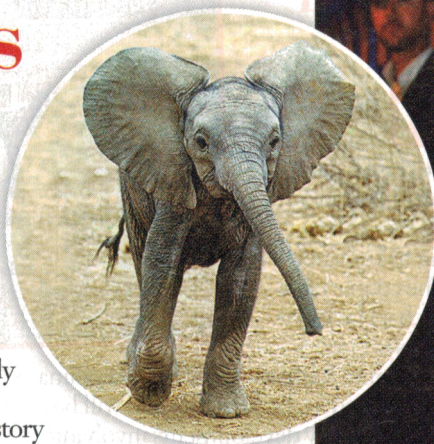

Jennifer only shares her home with Charlie, a Cavalier King Charles Spaniel.

▲“Oh, we can trade shoes,” Kate told *View* co-host Whoopi Goldberg, who’s also a size 11.

Does Paris want elephants to stop drinking beer?

NO! Paris Hilton reportedly called for a “global elephant campaign” after hearing a story about six wild elephants that broke into a farmer’s beer stash in India and wreaked havoc. “The elephants get drunk all of the time. It is becoming really dangerous. We need to stop making alcohol available to them,” she allegedly told World Entertainment News Network in a Tokyo interview picked up by the Associated Press. “It is just so sad.” However, Paris’ rep insists she never made comments about drunk elephants in India.

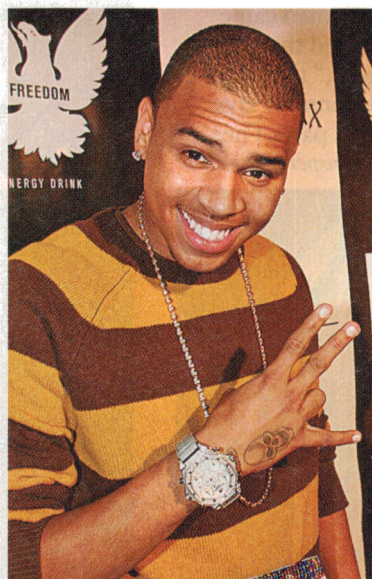

► Sangeeta Goswami, head of the animal-rights group People for Animals, told the AP that he hoped Paris would visit northeast India, a region “literally infested with elephants.”

Does Jon know how to change a lightbulb?

NO! Next time the light goes out, don’t call Jon Bon Jovi! He’s a successful rock star, but he never learned to master even simple household tasks like changing a blown bulb! “If the lightbulb goes dead, I throw out the lamp. I don’t know how to fix anything,” Jon confesses in *Best Life* magazine’s November issue. “Hey, I’m a singer!”

► It’s no wonder he isn’t handy — he’s never home. Jon will be on tour with Bon Jovi for much of 2008.

Does Chris throw away his underwear after one use?

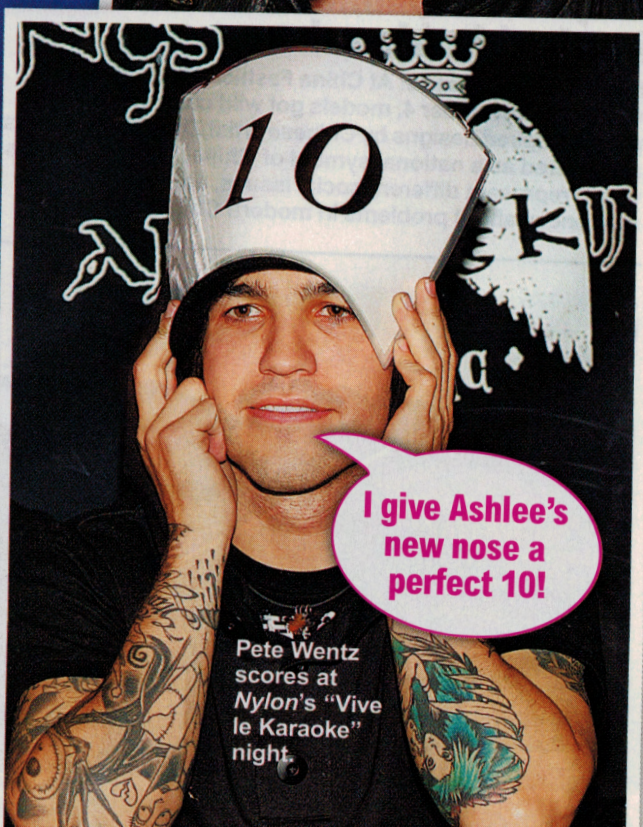

YES! R&B singer Chris Brown has clearly hit the big time! He can afford to wear his underpants just once and then toss it away. “I’m not a germaphobe,” he explained on MTV’s *TRL* on November 6. “I don’t feel like washing them because I’m always moving. So I buy different packs and I’m good for, like, a week, and then I’ve got to get a whole lot of new drawers.”

► Chris admits that he buys four or five packages of undies at a time.

What were they thinking?

Imagine if you could get inside the stars' heads!

GRIN AND BEAR IT

Why not? A panda-inspired fashion show

Don't feed the models! At China Fashion Week in Beijing, China, on November 4, models got wild on the runway in panda-inspired designs by Chinese artist Zhao Bandi. Pandas are revered as a national symbol of China, and the designs, which represent different social issues, are meant to raise awareness about problems in modern Chinese culture.

DRIVING WHILE HIGH

Just don't make a wrong turn!

Liu Suozhu performed this incredible feat at 65 feet in the air. The Chinese motorist drove his pickup truck along two steel tightrope cables across a gorge for a full 15 minutes in Xinjiang, China. "I just wanted to do something special," the daredevil driver said. At least there wasn't any traffic.

INCREDIBLE SURVIVOR

Meet the last *Titanic* passenger

As rare as the treasures pulled from the wreckage, 95-year-old Elizabeth Gladys "Millvina" Dean from Southampton, England, is the last living survivor of the ill-fated *Titanic*, which sunk in 1912. As a 2-month-old, Millvina was saved when she was lowered overboard in a sack into a lifeboat that held her mother and brother. Her father, Bertram Dean, was one of the 1,500 passengers who perished.

Baby Millvina, her mom, Ettie, and her brother, Bertram, are pictured before they boarded the ship.

SO CUTE

Puppies by the dozen!

Santa Claus made an early delivery for extra-good Isabelle Edmond — a dozen little stocking stuffers! The Edmonds, from Melbourne, Australia, got a big surprise when the family's golden retriever, Bonnie, gave birth to a litter of 12 adorable pups. "It's almost like having one human baby, multiplied by a thousand," Isabelle's mom, Jo, says.

ROCK AUCTION

Ozzy's not included

Want to make your home look more like that of the Osbournes? Rock's royal family is recreating their former mansion, featured on their MTV reality series, at the Gibson Guitar Showroom in Beverly Hills on November 30 and selling off their guitars, clothes, cars, sofas and more on auctionnetwork.com. "It's so hard to let go of personal possessions," Sharon tells *In Touch*. "Unfortunately, over the years, you don't realize how much you accumulate — and then one day you realize there's no room to even put a cup on a table!"

► Besides a pair of Ozzy's own signature specs and the four-wheeled vehicle that he almost killed himself on, fans can buy a mosaic portrait of Ozzy and Sharon, and a much talked-about Eiffel Tower sculpture. "We had more phone calls during the filming of *The Osbournes* about this piece than anything else," says Sharon. "Everybody wanted to know where we got it."

GREAT FIND

Is there a tooth fairy for mammoths?

While playing in his neighbor's yard in St. Joseph Ridge, Wis., 3-year-old Kaleb Kidd stumbled upon the fang of a prehistoric beast. The preschool paleontologist unearthed a 2-pound, 6-inch-long woolly mammoth tooth dating back approximately 30,000 years. Kaleb's grandfather, Gary, knew what it was right away — he found a similar fossil himself nine years ago!

The fossil is now on display at a gallery in Wisconsin, although Kaleb wasn't too happy about it: "He didn't want to let it go!" Kaleb's grandfather says.

We hear this guy's strong!

Manjit Singh attempted to break the Guinness World Record by pulling a double-decker bus, which weighs more than 15,000 pounds, down a London street — with his ears! Although the strong-lobed he-man managed to move the bus part of the way, he couldn't quite make the required 33 feet, so he'll have to try again.

"My wife & kids BETTER MAN"

Patrick Dempsey has a shocking secret. The man who brings McDreamy to life on *Grey's Anatomy* and stars in Disney's newest fairy-tale flick, *Enchanted*, says he doesn't believe in happily ever after. "I don't think anything is ever perfect," reveals the actor, who's been married to makeup artist Jillian for nine years and has three kids, Talula, 5, and 10-month-old twins Darby and Sullivan. "Love comes with a tremendous amount of work, understanding and sacrifice."

Still, the 41-year-old star is far from cynical when it comes to matters of the heart. "Love transforms you," he says. "I'm a better person because of my relationships with my wife and kids."

Do you think relationships are harder in real life than on TV or in movies?

Yes, they're a lot of work. But I find the more Jillian and I work through our issues and grow as individuals, the closer we get as a couple.

Are you as romantic as your on-screen characters?

It depends on my mood. There's a lot that goes into romance — it's not just candles and flowers.

Does it help or hurt that your wife, Jillian, isn't in the movie business?

She is a global colorist for Avon so she understands the business and is sympathetic to the journey. But, thank God she's not an actress — that would be difficult. I couldn't be married to an actress.

Why not?

Who would get to use the mirror first? I can barely live with myself, let alone another actor!

What is it like being the father of twins?

Well, I came home to projectile vomiting last night. I was like, "Wow, back to reality!" If you have kids, you understand. I really love it, though.

Is it more challenging than you thought it would be?

It's different. There are three kids you have to develop individual relationships with. You have to find time to be with each one separately. But there's something comforting about a house full of kids.

You had an early bout with fame. Is success more satisfying now that you're older?

At first, the attention threw me off. I wasn't quite prepared for it. Now, I feel like I've worked through a lot of hardship and appreciate where I am.

Did you have to take dancing lessons for the musical numbers in *Enchanted*?

Yes, that was the best part. But my co-star, Amy Adams, didn't want me to lead and I ended up ripping her toenail off!

Did you take any of your moves home to your wife?

Yes, but she doesn't let me lead either!

Patrick looks better than ever!

1987

Early days

At 21, Patrick married his friend's 48-year-old mom. "I learned a lot," he says of the seven-year union.

1992

Hard on himself

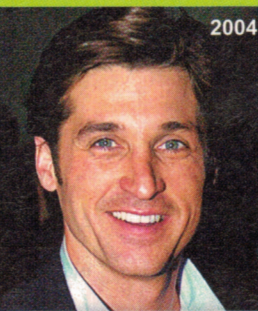

He says looking back is tough. "It's like seeing a yearbook picture. Do you really want to see that?"

1994

Fall from grace

In 1994, Patrick starred in *With Honors*, but says, "I wasn't on the hot list anymore."

2004

Back on the It list

Thanks to roles in *Sweet Home Alabama* and *Will & Grace*, Patrick's star began to rise again.

2007

Class clown

The best part of playing McDreamy? "I don't have to shave every day!" says Patrick. "It's great!"

The most dogs

Hayden's canine is a cover girl

Hayden Panettiere's pup, Madison, is one lucky dog. The white terrier mix has appeared on the cover of

Animal Fair magazine — and has a serious personality. "She sort of weaves in and out of my feet," Hayden, 18, says. "And barks at anything that breathes." She's also a good watchdog — which could cause trouble for Hayden's *Heroes* co-star and rumored love interest, Milo Ventimiglia. "Madison's not a big fan of guys," she laughs.

10

Madison is a handful. "She's pretty hyper," Hayden admits.

"When you lose a pet, it's like a death," Vanessa says.

9

Vanessa's dog disappeared

Vanessa Williams' 1-year-old Yorkie, Enzo, made headlines last summer when he went missing from the *Ugly Betty* star's Chappaqua, N.Y., home. "You stare at the empty bed, you stare at the bowl," Vanessa, 44, recalls. The star hung posters around her neighborhood and even sought psychic help. "She gave me some clues," Vanessa says. Fortunately, Enzo was implanted with a HomeAgain microchip, and the Connecticut shelter that found him was able to contact her.

▼ When Adam filled in for David Letterman, he brought Matzo Ball out onstage as a "practice guest" and showed a clip of the dog snoozing.

Matzo Ball is a TV star

Adam Sandler's beloved English bulldog, Matzo Ball, has a strong bond with the comedian's 18-month-old daughter, Sadie. "She crawls up on Matzo Ball and gives her a little rub," he says. But the bulldog is more than just another member of the Sandler clan — she's a star in her own right, having made a hilarious appearance on *Late Show With David Letterman* last March. Adam, 41, was nervous, but Matzo Ball stole the show!

Faulty electrical wires were the apparent cause of the fire.

7

Drew's dog saved her life

Drew Barrymore was asleep next to her then-husband, Tom Green, in 2001 when they heard her Labrador-chow mix, Flossie, making noise outside their bedroom. Minutes later, smoke alarms sounded and they all fled to a guest house, where they watched as a fire destroyed their two-story home. "I saved her... and she saved me right back." To show her gratitude, Drew later put her new \$6 million home in a trust for Flossie.

"Flossie is like my little daughter," says Drew, 32, who found the stray at an LA flea market.

Jen, with Norman (left) and her other dog Dolly, says, "They sent Norman's doggie head shot out and he wasn't getting any calls."

Oprah's dogs are works of art

Oprah's cocker spaniels, Sophie and Solomon, are true VIPs — very important pooches. So, it should come as no surprise that when the 53-year-old wanted a special way to celebrate her canine companions, she turned to an artist. Oprah paid Christine Merrill, who specializes in puppy portraits, thousands of dollars to fly to Chicago to paint Sophie and Solomon. Did Oprah like Christine's masterpiece? "There's a sweet sadness in Sophie's eyes that Christine was able to capture," she says.

When Oprah got three new puppies, she brought in famous dog whisperer Cesar Millan to help Sophie and Solomon adjust.

6

Oprah has reportedly left her dogs \$30 million in her will.

5

Norman is Jen's shining star

Jennifer Aniston met her dog, Norman, a corgi-terrier mix, on the set of *Friends*, where animal trainers unsuccessfully tried to make him a star. "He was so lazy that he had a terrible reputation," Jen says. "He wouldn't hit his mark." Norman may be a failed thespian, but he's been a trusted sidekick. The two are so close that Jen, 38, even sleeps in Norman's doggy bed! "We all get lonely," she explains. "It's a comfortable little bed that I can curl up in and sleep for an extra 20 minutes. Is that weird?"

4

"She's really smart," says Tori, 34. "She understands Spanish!"

CHATEAU
LA RUE

The hotel is featured on their show, *Tori & Dean: Inn Love*.

Tori named her B&B after Mimi

Not many dogs have hotels named after them, but Tori Spelling didn't hesitate to coin her and husband Dean McDermott's bed and breakfast Chateau La Rue after her adored pug, Mimi La Rue. On Mimi's online dogster profile, the 9-year-old pooch brags about it, saying, "My mommy and daddy's B&B is named after me!" As Tori explains, Mimi — who also had a starring role on Tori's VH1 show *So NoTORious* — is always ready for her close-up: "She comes screaming down the hallway and twirls around until you put her clothes on!"

3

Jack has as many fans as Mariah

"He's built up his own fan base," says Mariah. "I laughed for about 10 minutes when I found his web site!"

Mariah Carey is one of the biggest stars in the world, so it makes sense that her loyal dog, Jack, would follow suit. Over the years, he's received his own fan-created web site, guest spots in Mariah's videos and two *Live With Regis and Kelly* award nominations. "He's such a star," boasts Mariah, 38. Like his A-list mom, Jack is a diva and flies first class when traveling. "I'm not going to put him in the back with someone I don't know," Mariah explains. "He's my dog!"

Daisy made her debut onstage

Jessica Simpson's dog, Daisy, is no stranger to the spotlight. The fuzzy-faced Maltipoo made her debut on Jessica's 24th birthday in 2004 when her then-husband, Nick Lachey, stopped her Dallas concert to present her with the pooch. Since then, Daisy's made many public appearances, including *Good Morning America*. Even though her marriage to Nick didn't last, Jessica knows that Daisy will be in her life forever. "She goes with me everywhere," says Jessica, 27. "It's preparing me to be a mother, I think."

2

◀ Jessica says Daisy, who is named after her *Dukes of Hazzard* character, likes to "fall asleep on my shoulder."

Ellen made Iggy a household name

Ellen DeGeneres found herself in the doghouse for giving away adopted puppy Iggy, a 5-month-old Affenpinscher mix, to her hairdresser's family in September. "I thought I did a good thing," Ellen, 49, said. "I shouldn't have given him away." Since Iggy was taken back and given to a new family, this dog is having its day — in the spotlight! On November 12 and 13, Iggy appeared on *Entertainment Tonight* and filmed a public-service announcement with Mary Hart about pet adoption. "Iggy's doing famously, and in a loving home," says Keith A. Fink, a rep for Iggy.

1

Ellen, with girlfriend Portia de Rossi, 34, and one of her other dogs, spent \$3,000 to train and neuter Iggy (inset above), who is now with a new family in an undisclosed location "because of threats."

MERGING TASTES

Celebrity designer **Doug Wilson** of *Moving Up* weighs in:

"When people move in together, it's hard to incorporate everyone's individual preferences. I recommend trying to agree on color palettes and style (modern or vintage) and then putting one person in charge and trusting their vision."

Hilary,
Miss Teen USA

The home of MTV's *Pageant Place* is a lot like your average college dorm room — if your average dorm room housed three reigning beauty queens under its roof and the resident adviser was landlord Donald Trump! But for Miss Universe Riyo Mori, Miss USA Rachel Smith and Miss Teen USA Hilary Cruz, the luxurious New York City apartment is a place to retreat after conducting their many charitable duties on the road — and, of course, tune in to their reality show on Wednesdays at 10:30 p.m. E.T. “We’re out to change people’s stereotypes,” says Hilary. And where does The Donald fit in? “He’s like Charlie and we’re his Angels!” says Rachel.

Place

WHERE MISS USA FEELS FREE

Being raised in a military family has definitely had an effect on Miss USA Rachel Smith. "I'm probably the strictest about cleaning!" the 22-year-old Tennessee gal cheerfully confesses. This chaise lounge in her bedroom is her favorite spot in the apartment, where the voracious reader relaxes and pores over books like *The Alchemist* and *The Kite Runner*.

MISS UNIVERSE'S WARM WELCOME

"Ah, pink!" shouted Miss Universe Riyo Mori upon first seeing her spacious — and yes, very pink — Pageant Place bedroom. The 20-year-old Miss Japan is loving her New York experience, but is occasionally homesick. "My dream is to open up a dance school back in Japan," says Riyo, who still owns her first pair of ballet slippers from when she was 4 years old.

DOUG'S EASY DESIGN FIX

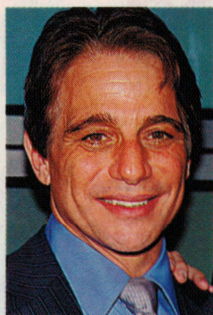

Celebrity designer Doug Wilson of *Moving Up* weighs in:

"You can easily make your own headboard with plywood, batting from a fabric store and fabric. Go to your local home store expert for specifics."

THE LITTLE SISTER MOVES IN

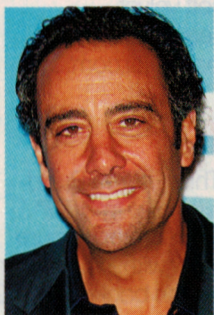

Miss Teen USA Hilary Cruz, who'll turn 19 on December 4, says she doesn't mind being the baby of the bunch. "I'm an only child, and this is my first time living away from home, so I'm grateful to have Rachel and Riyo," says the Colorado native, who moved in after taking over the crown from Katie Blair in August. **What** else helps her cope? A comfy bedroom full of photos of friends from back home — and lots of care packages from her parents, which she happily shares with her roommates.

STARS ON THE MOVE

TONY DANZA

The former talk-show host has put his five-bedroom Cape Cod-style home situated on 2.3 acres in Sherman Oaks, Calif., up for sale. The estate includes a pool house and a guest house.

BRAD GARRETT

The TV star, who is still trying to sell his home in the Hidden Hills area of LA, just bought a Malibu home for \$8.8 million. His neighbors include Brad Pitt and Angelina Jolie.

LEONARDO DICAPRIO

The actor, who already has two homes in Malibu and a house in the Hollywood Hills, has reportedly purchased a third beachfront property for \$6.4 million.

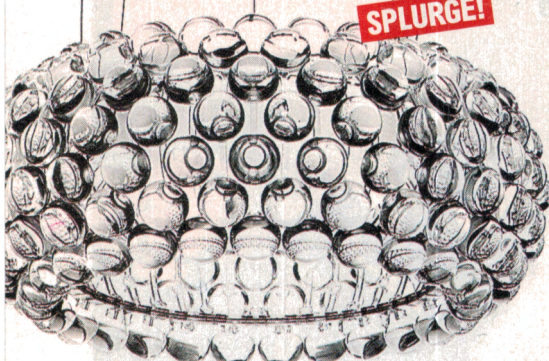

"Fabulous color and whimsical design add fun to function."

Sudoku The brain-teasing number game that everyone loves to play!

HERE'S HOW TO DO IT:

There are nine sections of nine squares in each puzzle. The object of the game is to fill in all the blank spaces with numbers from 1 to 9.

The numbers can be in any order, but there are a few catches:

- In each of the sections, no numbers can be repeated.
 - Numbers can't be repeated in each horizontal line of nine squares.
 - Numbers can't be repeated in each vertical line of nine squares.
- You solve the puzzle when you correctly fill in all of the squares.

SHE'S STILL DADDY'S GIRL

Even without her famous father, this star would still be a huge success, as she has talent and a big heart. Along with her family and work, this teen star, who started when she was 11, loves to shop. Who is she?

Answer: Milley Cyrus

Fun surprises ahead

SAGITTARIUS NOV 22 – DEC 21

Another reason to celebrate your birthday: A sexy stranger has a crush on you. Like fellow Sagittarius Ben Stiller, your instinct leads to a creative breakthrough.

LUCKY NUMBER: 15

CAPRICORN

DEC 22 – JAN 19

An unexpected present brightens your weekend. Like Kate Moss, your sense of style gets you noticed by the right person.

LUCKY NUMBER: 9

AQUARIUS

JAN 20 – FEB 18

You are offered a weekend getaway, so take advantage of the opportunity. Cash is coming your way.

LUCKY NUMBER: 3

PISCES

FEB 19 – MARCH 20

This week, a hookup turns into a romantic surprise, and an unexpected turn of events puts you in the spotlight.

LUCKY NUMBER: 13

ARIES

MARCH 21 – APRIL 19

Your energy — like that of Aries Katharine McPhee — is in overdrive, and a night out really heats up.

LUCKY NUMBER: 15

TAURUS

APRIL 20 – MAY 20

A friend gives you great advice that leads to something you've always wanted. You also find a real bargain while shopping!

LUCKY NUMBER: 2

GEMINI

MAY 21 – JUNE 21

You're getting as much attention as Gemini Heidi Klum does on the runway. Someone wants some time alone with you.

LUCKY NUMBER: 6

CANCER

JUNE 22 – JULY 22

A humdrum day turns into an exciting night for you — just like it often does for fellow Cancer Jessica Simpson. Your boss is watching you for all the right reasons.

LUCKY NUMBER: 1

LEO

JULY 23 – AUG 22

Whitney Houston isn't the only Leo who's ready to surprise everyone. Your charm brings you a lot of support.

LUCKY NUMBER: 12

VIRGO

AUG 23 – SEPT 22

A lot that you've been asking for is about to get accomplished, thanks in part to someone who truly loves you.

LUCKY NUMBER: 10

LIBRA

SEPT 23 – OCT 22

A good attitude gets results. Whether it's rearranging a room or getting ready for a big event, the world is here to make you happy.

LUCKY NUMBER: 8

SCORPIO

OCT 23 – NOV 21

Your plate is about to get full — and what's on it will be delicious! Like fellow Scorpio Demi Moore, you'll get to eat your cake, too.

LUCKY NUMBER: 4

Lucy Liu is 39 on December 2.

Ben Stiller turns 42 on November 30.

Nelly Furtado is 29 on December 2.

Britney Spears is 26 on December 2.

WHEN BRIT TURNED 25

On her birthday last year, Britney took her son Sean Preston to the zoo, then bought a \$6,000 faux fur coat. She ended the night at Hyde, partying with Paris Hilton (who gave her a teddy bear necklace) and Fergie (who gave her a cake).

Michael Vartan turns 39 on November 27.

“Britney Spears is reportedly holding an auction in order to ‘help children around the world.’”

Up for auction? Sean Preston and Jayden James.”

— Seth Meyers on *Saturday Night Live*'s Weekend Update

“I buy jeans that are tight in the rear end.”

I’m not kidding, I treat my cheeks like breasts in a push-up bra!”

— Kelly Ripa spills her bootylicious style secret to *Fitness* magazine.

“Oh, what a surprise. I think we guessed that. Either that or she swallowed a basketball.”

— Gloria Estefan isn’t exactly surprised that Jennifer Lopez confirmed she’s pregnant.

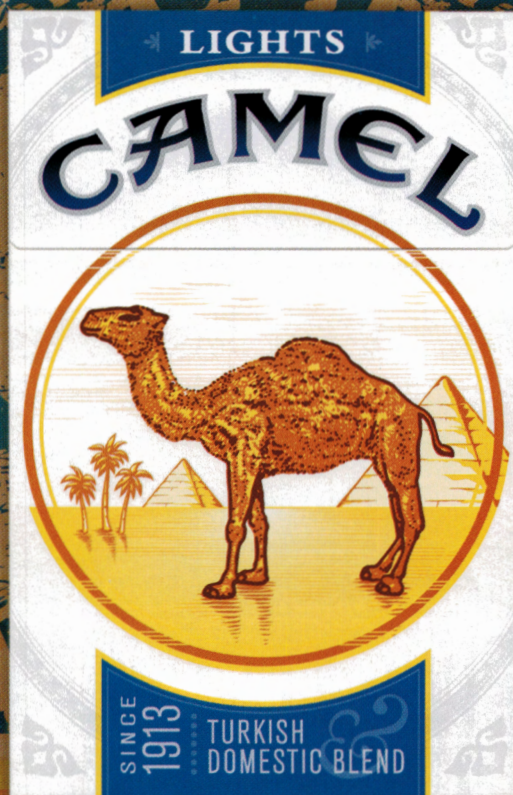

“Simon calls Randy and I ‘Tweedledee and Tweedledum.’ I’m dee, Randy’s the dum!”

— Paula Abdul is grateful that *American Idol* judge Simon Cowell calls Randy Jackson the “dum” one.
